Handbook of Quantitative Science and Technology Research Henk F. Moed, Wolfgang Glänzel, Ulrich

Schmoch, 2006-02-23 This handbook offers a state of the art overview of quantitative science and technology research. It focuses on the development and application of indicators derived from data on scientific or scholarly publications and patents. It comprises 34 chapters written by leading specialists in the various sub domains. These chapters deal with theoretical and methodological issues, illustrate applications, and highlight their policy context and relevance. Authors present a survey of the research topics they address and show their most recent achievements. The 34 chapters are arranged into 5 parts: Disciplinary Approaches, General Methodology, The Science System, The Technology System, and The Science Technology Interface. The Editor's Introduction provides a further specification of the handbook's scope and of the main topics addressed in its chapters. This handbook aims at four distinct groups of readers: practitioners in the field of science and technology studies, research students in this field, scientists, scholars, and technicians who are interested in a systematic, thorough analysis of their activities; policy makers and administrators who wish to be informed about the potentialities and limitations of the various approaches; and about their results.

Zone Journals Charles Wright, 1996 Charles Wright called his seventh collection Zone Journals to emphasize how the poems draw on time and place as their starting point. But despite the air of immediacy and informality, they are artfully composed, informed as always by Wright's profound sense of subliminal order.
