The Geologist Samuel Joseph Mackie, 1861 **Cerebellar Functions** J. Bloedel, J. Dichgans, W. Precht, 2012-12-06 Over the past few semesters a group of neurologists neurophysiologists and brain theorists in various departments of Tübingen University have gathered periodically in an effort to review ideas and evidence on cerebellar functions At times general solutions seemed close when credit was given to various theoretical proposals advanced since the early days of cerebellar physiology however it became clear in every case that a large part of the available facts refused to submit to the general ideas As believers in the power of scientific discussion we felt that the time was ripe for posing the problem of the cerebellum once more to a well articulated group of specialists that would include proponents of every disparate point of view The sponsorship of the Max Planck Society and of the Deutsche Forschungsgemeinschaft to whom we express our profound gratitude made it possible to organize an international meeting in September 1983 The aim of making new even extravagant ideas palatable to each other was well accomplished by the participants We trust that some of the ensuing excitement has been carried over into the printed version

The American Geologist Newton Horace Winchell, 1897 Includes section Review of recent geological literature *The American Geologist*, 1897 **International Catalogue of Scientific Literature, 1901-1914**, 1912 **Text-book of Geology** Archibald Geikie, 1901 **Siluria** Roderick Impey Murchison, 1859 *The Quarterly Journal of the Geological Society of London* Geological Society of London, 1880 Vols 1-108 include Proceedings of the society separately paged beginning with v 30 **Devonian Climate, Sea Level and Evolutionary Events** R. T. Becker, 1st, C. E. Brett, P. Königshof, 2nd, 2016-10-20 The geological and palaeontological records of climate change and evolutionary events reflect Earth's widely fluctuating climate systems Past climates hold the clues to understanding future developments In this context research on linked climate biodiversity and sea level fluctuations of the Devonian contributes to the general knowledge of deep time climate dynamics A fruitful co-operation between the International Geoscience Programme IGCP 596 and the International Subcommittee on Devonian Stratigraphy SDS addressed the complex succession of climate linked Devonian global events of varying magnitude The primary goal of IGCP 596 was to assess mid Palaeozoic climate changes and their impact on marine and terrestrial biodiversity using an interdisciplinary approach The focus of SDS includes a revision of the eustatic sea level curve and the integration of refined chrono and biostratigraphy with modern chemo-magneto-cyclo event and sequence stratigraphy This enabled the much improved dating and correlation of abiotic perturbations evolutionary changes organism and ecosystem ranges Results by 37 authors are presented in 14 chapters which cover the entire Devonian
