The World of Civil Aerospace Ian Jennions, 2019-05-28 Collaboratively written by eleven experts with extensive experience in the field of commercial aviation The World of Civil Aerospace is a unique book that defines its own category Covering the beginnings of commercial aviation aircraft design and certification manufacturing and testing airline operation maintenance and safety among other topics The World of Civil Aerospace shows the reader the fundamental yet almost invisible aspects of how the planes and airports we use every day actually function The title edited by Prof Ian Jennions from Cranfield University in the UK came about from the desire to share the inner workings of what it takes to create test approve certify and launch a new aircraft Not mention how to maintain it and make the user experience of flying it positive With the commercial aviation industry expected to continue to grow for decades to come the challenges of keeping aircraft in the air safely reliably and economically are enormous Thousands of engineers support personnel maintainers and crews go to work every day with one goal in mind to make sure air travel happens as it should And this is no trivial task The World of Civil Aerospace brings to light the incredible global network of coordinated tasks and skills needed to make it happen *Sukhoi Interceptors* Yefim Gordon, Dmitriy Komissarov, 2020-01-28 The first twenty years of Sukhoi supersonic interceptor development including the Su 15 a symbol of the Cold War and true guardian of the Soviet skies Closed in 1949 the Sukhoi Design Bureau was reborn in 1953 to meet an urgent demand for a fast interceptor that would counter the threat posed by NATO bombers It wasted no time developing a succession of missile armed Mach 2 interceptors characterized by delta wings the single engined Su 9 entered service in 1960 followed by the up armed Su 11 in 1964 and the twin engined Su 15 in 1967 Though built in modest numbers the three types became an important asset for the Soviet air defense force particularly the

more capable Su 15 which unfortunately became notorious for shooting down two intruding South Korean airliners within five years The Su 15 outlasted the Soviet Union the last being retired in 1996 There were also several Sukhoi interceptors that remained in prototype or project form All known versions are described as are operational details The book features many rare and previously unpublished photos
