Transition The First Decade:

Transition Mario I. Bléjer, Marko Skreb, 2001 A comparative analysis of eleven transition economies

Launching the First-Year Experience Movement John N. Gardner, 2023-07-03 As an archetypal student success higher educator myself I did not enter this profession intentionally But my life experiences did prepare me to be very successful at this work So what are those experiences and types of knowledge insight skills that equip one to do this kind of work This book is about encouraging the next generation of successors to use their experiences to become equity warriors within the system John N Gardner This book argues that today more than ever we need new and more student success leaders to step forward to make the changes that students need and it offers the story of one such leader in the belief that it will help others see how they can make their own contribution to this movement The author relates a story about events and individuals that launched a national and international movement to enable many more college students to proceed beyond the beginning college experience and complete the credential they are seeking It is also the author's personal history how he ended up spending his whole life in college and how college can make us wiser and more successful than when we started the journey John Gardner brings 55 years of professional experience to telling this story He begins with the story of how colleges can and do introduce students to life changing perspectives and ideas In Gardner's case it was a matter of being introduced to the question what is justice and then spending his entire professional life seeking ways to bring justice to underserved college students by making changes from the inside of the higher education system An on line compendium accompanies this book which includes prompts for guided reflection and questions and topics for discussion as well as additional material on the author's background and personal philosophy

Teaching First-Year College Students Maggie Murphy, 2019-05-15 The first year experience is an emerging hot topic in academic libraries and many librarians who work with first year students are interested in best practices for engaging and retaining them Professional discussion and interest groups conferences and vendor sponsored awards for librarians working with first year students are popping up left and right A critical aspect of libraries in the first year experience is effective information literacy instruction for first year students Research shows that despite growing up in a world rife with technology and information students entering college rarely bring with them the conceptual understandings and critical habits of thinking needed for finding evaluating and ethically using information in both academic and real world contexts Faculty in upper level courses expect students to learn about the research process in their first year of college and instructors in the first year curriculum expect librarians to teach this to their students Despite all this designing teaching and evaluating effective information literacy instruction specifically for first year students is not necessarily intuitive for instruction librarians That is why *Teaching First Year College Students A Practical Guide for Librarians* is a comprehensive how to guide for both new and experienced librarians interested in planning teaching and assessing library instruction for first year students The book Examines the related histories of library instruction and first

year experience initiatives Summarizes and synthesizes empirical research and educational theory about first year students as learners and novice researchers Establishes best practices for engaging first year students through active learning and inclusive teaching Features excerpts from interviews with a number of instruction librarians who work with first year students in a range of positions and instructional contexts Includes examples of activities lesson plans and assessment ideas for first year library instruction for common first year course scenarios Includes a template to use for library instruction lesson planning Written by a library instruction coordinator with a graduate degree in First Year Studies and a first year instruction librarian

Teaching First Year College Students A Practical Guide for Librarians is the first comprehensive how to guide for both new and experienced librarians interested in planning coordinating teaching and assessing library instruction for first year students

The First Year of College Robert S. Feldman, 2018 An examination of the first year of college and the intersecting challenges facing today's students written by top educational researchers

Handbook of Research on Coping Mechanisms for First-Year Students Transitioning to Higher Education Aloka, Peter, Mukuna, Kananga Robert, 2023-02-20 Transitioning from secondary to higher education is not a natural step for many first year students in higher education institutions There is a considerable difference between being a student at school and university and previous research has highlighted the difficulties faced by first year university students during their transition phase Higher education institutions and their departments acknowledge the challenges faced by new students and they differ in their approach to coping with the issue each seeks to find the most effective solution for its students To reduce the withdrawal rate during the first year of college higher education providers are expected to apply transition programs to help students transition The Handbook of Research on Coping Mechanisms for First Year Students Transitioning to Higher Education presents a comprehensive account of the dynamics in higher education institutions and culture shock for new students and analyzes models and theories of adjustment of new students in higher education institutions Covering key topics such as gender institutional support and success factors this reference work is ideal for administrators higher education professionals researchers scholars academicians practitioners instructors and students

Developing and Sustaining Successful First-Year Programs Gerald M. Greenfield, Jennifer R. Keup, John N. Gardner, 2013-06-26 Developing and Sustaining Successful First Year Programs First year programs and interventions have become critical launching pads for student success and retention in higher education However these programs often flounder not because of what they are trying to do but because of the ways in which they are implemented Developing and Sustaining Successful First Year Programs offers faculty academic administrators and student affairs professionals a comprehensive and practical resource that includes step by step guidance for developing new first year programs and enhancing existing programs The book explores the key elements that contribute to sustained student success and the programs that have the capacity to continue to meet student needs while making the most of scarce resources The authors show how to create and sustain critical

partnerships put in place the needed organizational structures and include strategies for developing effective assessments and evaluations Developing and Sustaining Successful First Year Programs is filled with illustrative examples and profiles of successful programs from a range of institutions that vary in size type selectivity and culture Examples of common programs and interventions include summer bridge programs student orientation first year seminars learning communities residential programs developmental education and many more Based in scholarly literature theory and practice the book highlights the initiatives that facilitate the transition learning development and success of new college students
