Edward Arthur Fath

Star Charts:

The observer's sky atlas with 50 star charts covering the entire sky. Erich Karkoschka, 1999 The Observer's Sky Atlas contains star charts and information for all those who observe the night sky with unaided eyes with binoculars or with small telescopes and also for those who just wish to look at constellations and interesting objects Equally useful for the beginning observer and the old hand the atlas presents a short introduction into observing the sky and a thorough description of the star charts and tables clearly arranged charts of all the stars visible with the unaided eye up to 6th magnitude enlarged chart sections for binocular observation highlighting 250 interesting nebulae galaxies and stellar clusters to magnitude 9 a catalog of more than 1000 objects that takes into account the far reaching measurements of Hipparcos Satellite published in 1997 tables of predicted separations of binary stars until the year 2015 The Observer's Sky Atlas is an indispensable and handy companion for every observer It has appeared in four languages From reviews of the first edition the most informative little sky guide in the business Astronomy

Star Maps Nick Kanas, 2012-06-05 Until the publication of the first edition of Star Maps books were either general histories of astronomy using examples of antiquarian celestial maps as illustrations or catalogs of celestial atlases that failed to trace the flow of sky map development over time The second edition focuses on the development of contemporary views of the heavens and advances in map making It captures the beauty and awe of the heavens through images from antiquarian celestial prints and star atlases This book uniquely combines a number of features 1 the history of celestial cartography is traced from ancient to modern times 2 this development is integrated with contemporary cosmological systems 3 the artistry of sky maps is shown using beautiful color images from actual celestial atlases and prints 4 each illustration is accompanied by a legend explaining what is being shown and 5 the text is written for the lay reader based on the author's experience with writing articles for amateur astronomy and map collector magazines This updated second edition of Star Maps contains over 50 new pages of text and 44 new images 16 in color including completely new sections on celestial frontispieces deep sky objects playing card maps additional cartographers and modern computerized star maps There is also expanded material about celestial globes volvelles telescopes and planets and asteroids

The Universe of Stars Richard Anthony Proctor, 1878

The Cambridge Star Atlas Wil Tirion, 2001-03-08 The Cambridge Star Atlas covers the entire sky both northern and southern latitudes in an attractive format that is suitable for beginners and experienced astronomical observers There is a series of monthly sky charts followed by an atlas of the whole sky arranged in 20 overlapping full colour charts Each chart shows stars down to magnitude 6.5 together with about 900 non stellar objects such as clusters and galaxies which can be seen with binoculars or a small telescope There is a comprehensive map of the Moon's surface showing craters and other named features Wil Tirion is the world's foremost designer of astronomical maps For this new edition he has devised improved versions of all the charts and the text and star data have been completely revised based on the latest information Clear authoritative and easy to use
