For readers interested in weed science Weed Science - A Plea for Thought - Revisited Robert L. Zimdahl, 2011-09-26. Weed scientists are confident of increasing production through agricultural technology including herbicides but do not must ask if the moral obligation to feed people is sufficient justification for the benefits and harms achieved. A continuing rigorous examination of the science's goals that leads to appropriate change is advocated. Weed scientists have a research consensus a paradigm. Weeds must be controlled. Herbicides are the best control technology. Agriculture's practitioners should discuss the necessity and risks of their technology. Discussion must include scientific evidence and value laden arguments. *Weed Technology*, 2009 **CRC Handbook of Plant Science in Agriculture** A. A. Hanson, 2019-07-18.
