Communications Infrastructure, Systems and Applications Rashid Mehmood, Eduardo Cerqueira, Radoslaw Piesiewicz, Imrich Chlamtac, 2009-12-18 The First International ICST Conference on Communications Infrastructure Systems and Applications in Europe EuropeComm 2009 was held August 11-13 2009 in London. EuropeComm 2009 brought together decision makers from the EU communication top researchers and industry executives to discuss the directions of communications research and development in Europe. The event also attracted academia and industry representatives as well as government officials to discuss the current developments and future trends in technology applications and services in the communications field. Organizing this conference was motivated by the fact that the development and deployment of future services will require a common global scale infrastructure and therefore it is important that designers and stakeholders from all the systems stacks come together to discuss these developments. Rapidly decreasing costs of computational power storage capacity and communication bandwidth have led to the development of a multitude of applications carrying an increasingly huge amount of traffic on the global networking infrastructure. What we have seen is an evolution of an infrastructure looking for networked applications has evolved into an infrastructure struggling to meet the social technological and business challenges posed by the plethora of bandwidth hungry emerging applications.
