Why 2k:

Mobilfunk Erich Pehl, 2005 *Boolean Models and Methods in Mathematics, Computer Science, and Engineering* Yves Crama, Peter L. Hammer, 2010-06-28 A collection of papers written by prominent experts that examine a variety of advanced topics related to Boolean functions and expressions Differential Topology Victor Guillemin, Alan Pollack, 2025-08-22 Differential Topology provides an elementary and intuitive introduction to the study of smooth manifolds In the years since its first publication Guillemin and Pollack's book has become a standard text on the subject It is a jewel of mathematical exposition judiciously picking exactly the right mixture of detail and generality to display the richness within The text is mostly self contained requiring only undergraduate analysis and linear algebra By relying on a unifying idea transversality the authors are able to avoid the use of big machinery or ad hoc techniques to establish the main results In this way they present intelligent treatments of important theorems such as the Lefschetz fixed point theorem the Poincaré Hopf index theorem and Stokes theorem The book has a wealth of exercises of various types Some are routine explorations of the main material In others the students are guided step by step through proofs of fundamental results such as the Jordan Brouwer separation theorem An exercise section in Chapter 4 leads the student through a construction of de Rham cohomology and a proof of its homotopy invariance The book is suitable for either an introductory graduate course or an advanced undergraduate course **Dracomantium V. 1** Draconis Blackthorne, 2013-11-25 The 1st in the Dracomantium Collection featuring 3 codices in 1 tome 6 Dracomerth Codex Satani Written as a result of study and experimentation in The Occult combining various traditions and Satanizing them truly giving The Devil His due The rites written therein are a result of both meditation the application of Greater Lesser Magical principles which have proven by results to work Includes The Black Book of Shadows 6 The Devil's Scroll Codex Diaboli A collection of misanthropic Satanically philosophical essays providing insights into human motivations social commentary as well as counter culture thought 6 Satanic Serenades Codex Noctum Infernal Reflections upon both vital existence and mythology written in a beautiful sometimes terrifying polemical imaginative Gothic style inspiring contemplation darkest entertainment for those who resonate to The Satanic perspective and appreciate the sinister aesthetic Includes previous covers An Aristotelian Realist Philosophy of Mathematics J. Franklin, 2014-04-09 Mathematics is as much a science of the real world as biology is It is the science of the world's quantitative aspects such as ratio and structural or patterned aspects such as symmetry The book develops a complete philosophy of mathematics that contrasts with the usual Platonist and nominalist options **Mister Dreyfus' Demons** Peter Dabbene, 2001-10-10 Mr Dreyfus Demons is the story of Fred Dreyfus an average individual who is thrust into a most unusual situation Waking from an office party the night before he discovers a door that leads straight into the infernal realm of hell Condemned to hell on a technicality his only chance of escape lies with the scruples of three random New Yorkers or his own wits As he is introduced to the scheming characters who inhabit the netherworld Fred realizes that his best hope for escape

lies within himself Seizing opportunities as they present themselves Fred forges tenuous alliances in a plan of escape born of necessity and constantly shifting with the political tide of hell What people are saying about Mr Dreyfus Demons Not how it happened at all Adolf Hitler Peters perspicacious pastiche prevents pigeonholing plowing past perfunctory potboilers and providing a premier potent primer on politics and propaganda Printed with precision peerless and penetrating passionate and patient the puissant prose pesters for promotion and propagation The Spirit of Spiro Agnew Weekly Newsletter Reading this book gave me a good idea of what hell must really be like Anonymous Oh yeah this is a good book Real good The Sarcastic Times The best foreword I ever wrote John Rapacciuolo Excellent font work The Font Fount A Bippy Spiffs Book Consortium Alternate Selection Winner of the Bippy Spiff Certificate of Appreciation for Middlebrow Literature Peter Dabbene has also written Prime Movements a collection of short stories and The Invisible Book a nine hundred page novel about marketing fraud
