Strategic Logistics Management - Decision-Making in Times of Great Uncertainty Heiner Offenbächer, 2006-11-18 Seminar

paper from the year 2006 in the subject Business economics Supply Production Logistics grade 1 0 European Business School International University Schlo Reichartshausen Oestrich Winkel SMI Supply Management Institute course Seminararbeit Logistics and Business Engineering language English abstract In the light of the ongoing globalization and evolution of today s business world logistics has gained significant visibility and is regarded as a critical link to improved corporate performance The value of the global logistics market accounted for 591 1 billion in 2005 and is expected to further grow by 22 1% until 2010 Apart from a constant pressure to reduce costs and improve efficiency logistics increasingly serves as a differentiating feature for products and an important lever for improving customer satisfaction Coordination with other departments also plays a crucial role The increasing complexity and dynamics of the business world did not leave logistics unaffected Key drivers of uncertainty include globalization of supply and customer bases shortening of product life cycles increasing competition and more demanding customers Thus the challenge for logistics managers nowadays is to constantly balance a need to perform well on hard measures of performance while responding to a constantly changing environment With respect to logistics increasing importance for corporate success reacting to contingencies by crisis management and firefighting is no longer an option Instead logistics managers must proactively and strategically plan for the future and prepare for change

Strategic Logistics Management, 2017 *Strategic Logistics Management* James R. Stock, Douglas M. Lambert, 1987-01-01 Notable changes occurring in the global marketplace since the publication of the first three editions of this book 1982 1987 and 1993 have included e commerce and widespread use of the Internet growth of supply chain management a continued explosion of computer and information technology worldwide development of 24 hour markets with many organizations operating worldwide and a continued corporate emphasis on quality and customer satisfaction Trade agreements such as North America Free Trade Agreement NAFTA European Union ASEAN and Mercosur have enabled corporations to implement regional if not entirely global logistics strategies The fourth edition of Strategic Logistics Management has been significantly expanded to reflect these and the many other changes that have occurred as well as to include state of the art logistics information and technology The basic tenets of the previous editions have been retained but new material has been added to make the book more managerial integrative and cutting edge Strategic Logistics Management is still the only text that takes a marketing orientation and views the subject from a customer satisfaction perspective While emphasizing the marketing aspects of logistics it integrates all of the functional areas of the business as well as incorporating logistics into supply chain management This book has been extensively revised and updated in the areas of technology global coverage and transportation This book features brand new chapters on Supply Chain Management Ch 2 and Measuring and Selling the Value of Logistics Ch 17

Strategic Logistics Management Gerard De Villiers, Gideon Nieman, Wesley Niemann, 2013 *Logistics Management and Strategy* Alan Harrison, Heather Skipworth, Remko I. van Hoek, James Aitken, 2019 *Strategic Logistics Management* Erik Sandberg, 2025-01-03 Logistics

Global Logistics and Distribution Planning C. Donald J. Waters,1999 Examining the latest approaches in formulating strategy this te t provides ideas and practical information on the current late 1990s and future trends in logistics and distribution

Distribution David F. Ross,2012-12-06 It has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events It is not that the facts of history have changed No one will dispute that the battle of Waterloo occurred on June 11 1815 or that the allied invasion of Europe began on June 6 1944 What each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation By examining the facts of history from a

new perspective today's historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals. Although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns, inventory replenishment, and income statements, the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today's organizational, cultural, and economic realities. Hopefully, the result will be a new synthesis where a whole new perspective will break forth, exposing new directions and opportunities.

Strategic Logistic Management Lambert, Stock, 1993-03-01
Strategic Logistics Management Principles in Urban Public Transport Wayne Russell Duff-Riddell, 1998
Transportation, Land Use and Integration I.M. Schoeman, 2017-05-30

For many years, the integration of the location of land use and activities in spatial systems, as well as the provision of transport in movement of goods, services, and people, has been recognized as a challenge amongst various specialists, including engineers, transportation planners, economists, environmentalists, urban and regional planners, and developers. The purpose of this book is to address transportation modelling in terms of technology, techniques, and methodology, application in context to the interface between transportation systems, land use planning, and environmental challenges, and application. The methodology of transportation modelling is applied to international practices and application based on specific case studies, inclusive of public transportation projects, transportation modelling techniques in practice, international research agenda, network design, and channel strategies, strategic planning, application of technology in traffic surveys, and interpretation, emissions from transportation systems, application of mathematical models, and the interface between environment, land use, and development in terms of location in space and the resulting activities. Of value to both theorists and practitioners, this book references the integration of transportation modelling techniques within an interdisciplinary environment inside all spatial systems.

Logistics Management Hans-Christian Pfohl, 2023-04-22

Based on the drivers of the development of logistics, the success factors of logistics management in excellent companies are analyzed. Logistics management in and between companies requires a change in thinking, on the operational as well as on the strategic and normative level of action. The functions of logistics management are explained in detail and discussed with regard to their design. The explanations are based on the presentation of the interplay of the normative, strategic, and operational levels of action, and the contribution of logistics to the achievement of corporate objectives. Essential building blocks for the implementation of the logistics concept are strategic logistics planning and logistics controlling. In addition to the organizational and operational issues, supply chain management is becoming increasingly important for the interorganizational realization of the logistics concept because it is precisely from cooperation and collaboration that additional potential for sustainable value enhancement of the company through logistics arises. In order to exploit these potentials, it is important to promote suitable employees in a targeted manner. Therefore, the book concludes with a

consideration of the special aspects of personnel management in logistics On the one hand the book addresses the practitioner who wants to profitably implement the concepts presented here On the other hand it is aimed at lecturers at universities colleges and academies to support their courses Students who are interested in the management related issues of logistics will receive valuable information for their studies and future professional activities Instructor's Manual to Accompany Strategic Logistics Management, Second Edition James R. Stock, Douglas M. Lambert, 1993 Role of Team Work in Strategic Planning Mutuku Andrew Muli, Davidson Mghanga Mwaisaka, Florence Jane Wangui Kamau, George Muriithi Munyi, Nixon Kiplagat Mutai, 2023-06-26 TOPICS IN THE BOOK Influence of Team Teaching on the Performance of Mathematics in Public Secondary Schools in Makueni Sub County Kenya Influence of Participative Leadership Style on Employee Job Satisfaction in Commercial Banks in Kenya Effect of Innovative Culture on Service Delivery in Huduma Centers in Kenya Effect of Strategic Value Chain Positioning on Firm s Performance A Case of Pharmaceutical Supply Chain Firms in Kenya Factors That Hinder Strategy Implementation in Public Secondary Schools A Case Study of Nakuru Municipality
