International Aerospace and Ground Conference on Lightning and Static Electricity, 1991 *Proceedings of the 9th International Performance Analysis Workshop and Conference & 5th IACSS Conference* Arnold Baca, Juliana Exel, Martin Lames, Nic James, Nimai Parmar, 2022-04-09 This covers the PACSS 2021 which approached interdisciplinary collaboration between theoretical computer science and practical performance analysis through an online workshop and conference. Readers find in this book the peer reviewed and discussed evidences on how computer scientists and performance analysts can and have worked together to solve both applied and research based problems in elite sport using the methods of computer science. In this edition we organize the content according to four major topics: machine learning, text mining, best practice and interdisciplinary collaboration. This is a refined material written by leading experts with up to date overview of research in the multidisciplinary field of computer science and elite sport performance analysis.

Advanced Anomaly Detection Technologies and Applications in Energy Systems Tinghui Ouyang, Yusen He, Xun Shen, Zhenhao Tang, Yahui Zhang, 2025-02-17 Anomaly detection is an important topic which has been well studied in diverse research areas and application domains. It generally involves detection of abnormal data, unhealthy status, fault diagnosis and can be helpful to guarantee industrial systems stability, security and economy. As development of intelligent industries and sensor systems grows, large amounts of data become easily available and challenges arise in industrial systems anomaly detection. One typical case is the study within energy related systems like thermal energy, renewable energy, study e.g. wind energy, photovoltaic, electric vehicles and so on. These systems can involve various data formats and more complex data structures making anomaly data detection a challenge. Currently under the development of deep learning and big data analytics many promising results have been achieved in energy systems anomaly data detection. However many challenging problems remain unsolved due to the complex nature of energy industries. New techniques and advanced engineering applications on anomaly detection in energy systems still appeal to a wide range of scholars and industries.
