An Examination of Learner-centered Professional Development for Reluctant Teachers

Patricia Orchard, 2007 This study focused on professional development practices that empowered reluctant teachers to implement and sustain improved instructional practices Constructs were viewed through the perspective of learner centered principles in order to connect scientifically proven practices for teaching students in the classroom to effective professional development practices for teachers Data for this mixed design study were gathered from the LCPD School Practices Survey transcripts of follow up interviews with once reluctant teachers and school documents Statistical correlations were used to analyze the variables of the quantitative portion of the study Findings indicated that when schools implemented learner centered professional development practices student achievement increased and teacher reluctance toward new practices and change decreased The qualitative data were coded and analyzed and cross referenced with school documents Four

themes emerged as to the types of professional development that encouraged reluctant teachers to sustain new practices 1 show them why and how 2 empower them to safely explore 3 emphasize their professional contribution and 4 engage them in meaningful conversations This study calls for additional research to better understand the nature of administrator reluctance toward new practices as well as how the increased leadership capacity for teachers engaged in learner centered professional development impacts the roles and relationships within the traditional educational hierarchy Another area for future research would be to look at how the restructuring of traditional schools into professional learning communities might impact the traditional job categories of public schools

Enhancing Professional Development for Teachers National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Teacher Advisory Council, Committee on Enhancing Professional Development for Teachers, 2007-10-04 Teachers like other professionals need to stay informed about new knowledge and technologies Yet many express dissatisfaction with the professional development opportunities made available to them in schools and insist that the most effective development programs they have experienced have been self initiated Enhancing Professional Development for Teachers explores how the provision of professional development through online media has had a significant influence on the professional lives of an increasing number of teachers Growing numbers of educators contend that online teacher professional development OTPD has the potential to enhance and even transform teachers effectiveness in their classrooms and over the course of their careers They also acknowledge that it raises many challenging questions regarding costs equity access to technology quality of materials and other issues Enhancing Professional Development for Teachers suggests that teachers be active participants in planning and implementation of any new technologies that enhance professional development The book recommends that federal and state policy makers take on the responsibility of promoting equal access to technology while the federal government and foundations play an important role by supporting the development evaluation and revision of OTPD

A
Design for Professional Development of Teachers T. Vasumathi, 2010 Teachers professional development is not exclusively concerned with supporting teaching and knowledge Support is required for teachers to reflect on their existing practice and adapt new knowledge and beliefs to their own teaching milieu Therefore design policies that support teachers are very vital for professional development Knowledge on the environment through which teachers attainment and use of new knowledge and skills helps to develop effective models for teachers professional development The responsibility of teacher as learners and teachers effective design for professional development culture and the relation with the critical inquiry and aspects of

curriculum framework are the key factors that help to design and promote learner centered professional development. Success of professional development depends on how teachers are able to learn the new skills and recognize the disadvantages of previous beliefs and practices. Teachers must be in a position to see the methods from the pupils perspective and therefore existing pre packed trainings are not always helpful. The effective professional development require engaging the teachers in practical tasks and provide opportunities to observe, assess and reflect on the new practices. participant driven and grounded in enquiry, reflection, experimentation, collaborate and associate in sharing of knowledge, connect, provide support through modeling, coaching as well as collective solving of problems and has to connect other aspects of the change. The professional development programme also have to focus on the physical and mental well being of teachers. New policy framework exploring above aspects involving teacher as both learner and teacher for professional development are discussed in this paper.

Designing Professional Development for Teachers of Science and Mathematics Susan Loucks-Horsley, Katherine E. Stiles, Susan Mundry, Nancy Love, Peter W. Hewson, 2009-11-24. This third edition represents the gold standard of resources for those working in the field of professional development. My staff and I highly recommend this book as a primary resource for designing and continuously improving professional development programs for teachers of science and mathematics. Unlike other resources this unique and important book provides current research, an updated strategic planning framework and access to a portfolio of best practices for informing your work. Sally Goetz Shuler, Executive Director, National Science Resources Center. In the 21st century when STEM education has become vital for our students and our nation and the importance of quality professional development has increased at least tenfold, this seminal work should be required reading for every education leader. It is both practical and scholarly in guiding a school toward a culture of continuous learning and improvement. Harold Pratt, President, Science Curriculum Inc. Former President, National Science Teachers Association. The classic guide for designing robust science and mathematics professional development programs. This expanded edition of one of the most widely cited resources in the field of professional learning for mathematics and science educators demonstrates how to design professional development for teachers that is directly linked to improving student learning. Presenting an updated professional development PD planning framework, the third edition of the bestseller reflects current research on PD design, underscores how beliefs and local factors can influence the PD design, illustrates a wide range of PD strategies and emphasizes the importance of continuous program monitoring. Combining strategies to address diverse needs, building cultures that sustain learning. An inspiring blend of theory and practical wisdom. *Designing Professional Development for Teachers of Science and Mathematics* remains a highly regarded reference for improving professional practice and student achievement.

Technology as a Catalyst for School Communities Mary Burns, K. Victoria Dimock, 2007 Technology as a Catalyst for School Communities Beyond Boxes and Bandwidth tells the story of how three disparate schools handle the many challenges of integrating technology into their classrooms Teachers and administrators alike will share familiar feelings as they watch the professional learning communities progress toward the change that makes an enormous difference in how they teach and learn from each other and their students This book provides an attainable approach for educators to create their own communities of practice for the purposes of school improvement The case studies illustrate how administrators and teachers work together to find solutions to the best ways to integrate technology in the classroom In the process through their collaborative work they discover that they learned much more than the technical skills they first thought would be the

focus of their common inquiry In creating their communities of practice the isolation of the classroom is removed new ways of thinking and doing are embraced and they learn how to learn again As the teachers reach out to their peers and students giving and receiving support in a cooperative learning endeavor a new enthusiasm permeates their schools *Creating Teacher-centered Professional Development: Integrating Multimedia Into the Curriculum Using an Electronic Whiteboard* Ursula Accumanno,2009 *The Rural Educator* ,1980 **State Plan for Professional Development of School Staffs** ,1977 Teaching What They Learn, Learning What They Live Brad Olsen,2015-11-17 Cogent interesting and provocative from the foreword by Ann Lieberman Teaching What They Learn Learning What They Live explores the multiple social political and epistemological domains that comprise learning to teach Based on a study of eight beginning English teachers at four different university teacher preparation programs this book examines the ways in which beginning teachers personal dispositions and conceptions combines with their teacher preparation programs professional knowledge and contexts to form their understandings of and approaches toward teaching Brad Olsen recasts learning to teach as a continuous situated identity process in which prior experiences produce deeply embedded ways of viewing the world that go on to organize current future experience into meaning Since experience shapes learning and everyone acquires different sets of experience no individual teacher s knowledge is exactly like another s Yet Olsen shows also that the process by which a teacher constructs professional knowledge is common the what of teacher knowledge varies but the how remains the same
