Teaching For Transfer Fostering Generalization In Learning:

Teaching for Transfer Anne McKeough, Judy Lee Lupart, Anthony Marini, 1995 The transfer of learning is universally accepted as the ultimate aim of teaching Facilitating knowledge transfer has perplexed educators and psychologists over time and across theoretical frameworks it remains a central issue for today's practitioners and theorists This volume examines the reasons for past failures and offers a reconceptualization of the notion of knowledge transfer its problems and limitations as well as its possibilities Leading scholars outline programs of instruction that have effectively produced transfer at a variety of levels from kindergarten to university They also explore a broad range of issues related to learning transfer including conceptual development domain specific knowledge learning strategies communities of learners and disposition The work of these contributors epitomizes theory practice integration and enables the reader to review the reciprocal relation between the two that is so essential to good theorizing and effective teaching *Transfer of Learning* Robert E. Haskell, 2001 This text addresses the problem of how our past or current learning influences is generalised and is applied or adapted to similar or new situations It illustrates how transfer of learning can be promoted in the classroom and everyday life

The Transfer of Learning Dr Lex McDonald, Dr Sarah Leberman, Dr Stephanie Doyle, 2012-10-01 The book addresses a crucial issue for all involved in education and training the transfer of learning to new and different contexts Educators employers and learners face the problem of ensuring that what is learnt in the classroom is able to be adapted and used in the workplace It focuses on adult learners in professional and vocational contexts The authors provide an accessible book on the transfer of learning which draws on multi disciplinary perspectives from education psychology and management The Transfer of Learning will be useful both for postgraduate students and for practitioners wanting to deepen their understanding of transfer and for those interested in practical applications It combines theory and practice from international research and the authors own case studies of transfer involving learners engaged in professional development and study towards qualifications Theories of adult learning change and lifelong learning are discussed in relation to the transfer of learning The purpose of this book is to emphasise to tertiary educators and trainers the importance of transfer and in doing so highlight the participants voices as central foci in coming to an understanding of the process By doing this it balances the literature which has to date emphasized transfer from a trainer's and or organization's perspective There has been little if any substantive material on tertiary transfer issues and yet demands are increasing for tertiary education providers to be more accountable and more focused on developing students ability to use their learning in everyday work situations The book is unique in that it adopts a phenomenological perspective and underscores the significance of the participants voices in understanding issues **Transfer of Learning in Professional and Vocational Education** Vivienne E Cree, Cathlin Macaulay, 2002-01-04 Combining an accessible presentation of the underlying theory of transfer of learning which explains how to put theory into practice this is a text which is relevant to teaching for transfer in any professional or

vocational context The first part of the book looks at what transfer of learning means how it operates the implications for teaching issues such as assessment competence outcomes In the second part contributors present case studies from social work which show how specific teaching methods can be successfully used to make the maximum use of the student s previous experience These include personal construct psychology enquiry and action learning intentional observation critical incident analysis reflective diaries process recording information technology Information on each teaching method is presented in enough detail to allow the educator to go away and use it
