

Teaching the Introductory Public Relations Course: Pedagogical Recommendations

LaKesha N. Anderson

Keywords: public relations, pedagogy, higher education, teaching

Abstract: This article explores the foundations and the content areas that ground the introductory public relations course. Examples of two assignments designed to help students think critically, apply knowledge, and improve their writing skills are offered, as well as the identification of several challenges both students and instructors face and a brief discussion of the unique advantages provided by this course.

This understanding of public relations, often described as *relationship management*, still is relevant today; however, key words such as “influence” and “engagement” have begun to creep into the industry jargon. Modern public relations, then, is essentially about engaging stakeholders in a relationship that spans across multiple platforms in an effort to influence public perceptions of a client organization. This article highlights some of the concepts and models that ground most introductory public relations courses, content areas often addressed in these courses, assignments that may be of value when teaching the course, and both student- and instructor-centered issues related to teaching public relations.
