Perspectives on Assessment and Evaluation in International Schools Jeff Thompson, Mary Hayden, 2018-07-30

Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide. In an international context, assessment and evaluation data are increasingly widely used for accountability and quality assurance purposes at individual, student, institutional, national, and global levels. This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally. Nor has it set out to cover the myriad technical issues with which assessment and evaluation are inevitably concerned. Rather, a number of authors working within different contexts of international education, whether as teachers or leaders in international schools, administrators in international examination bodies, or researchers in international educational research organisations, have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation, be that assessment of student achievement, evaluation of teacher effectiveness, or evaluation of school quality. The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic, cultural, social, and personal contexts, and in this book, valuable contributions are shared by colleagues who are authorities in the field. It is their personal views on assessment and evaluation derived from professional practice in the international sphere that have been brought together here.

Frontiers of Fundamental Physics FFP16 Ekrem Aydiner, Burra G. Sidharth, Marisa Michelini, Christian Corda, 2024-05-17. This book is a collection of contributions presented at the 16th annual international symposium Frontiers of Fundamental Physics FFP16, supported by Istanbul University. As a document of the latest occurrence of this very important gathering, it presents the most recent advances in fundamental physics and physics teaching. For nearly fifteen years, the FFP has attracted some of the greatest physicists in the world. The broad objective of the entire endeavor has been to enable scholars working in slightly different areas to meet on a single platform. Even with this particular year's safety restrictions arising from Covid, we feel that the general mission has been carried out as fully as in any year. The book features addresses given by a host of expert contributors, all of which are organized according to seven individual themes. The areas covered include Astronomy and Astrophysics, Particle Physics, Theoretical Physics, Gravitation and Cosmology, Computational Physics, Condensed Matter Physics, Complex Systems, and related areas. This book should prove to be a veritable bounty for anyone with an interest in the continued evolution of our understanding of the physical world.

Creating Learning Settings Gary Natriello, 2023-04-28. *Creating Learning Settings* examines the design and implementation of learning settings informed by the newest most expansive insights into how people learn in the post industrial age. Educators today are tasked with moving beyond the fixed traditional practices that have long dominated formal schooling and becoming more dynamic and strategic in arranging learners, facilitators, resources on site and virtual environments and learning experiences. Integrating contemporary theoretical approaches and empirical studies this book offers a systematic approach to creating settings that leverage the physical, digital, resource and social dimensions necessary to support learning.

Confronting Today's Issues Chad Prosser, Denise Spirou, Jeffrey L. Buller, 2019-12-10. This book examines some of the most important challenges facing administrators and other professionals in PreK-12 schools today: safety and security, hiring and evaluating members of the faculty and staff, dealing with students' academic and behavioral challenges, assessing student performance, responding to disengaged or overly engaged parents, and handling external pressures from the community. It also explores ideas for how to design the types of school our students will need in the future and cope with the realities of trying to develop these schools in a difficult educational environment. Preferring practical advice over unsupported hypotheses and adopting clear, instructive language rather than educational jargon, the authors draw upon their own experience as well as some of the best research currently being conducted in the field of educational leadership. The book is suitable for self-study, workshops, education courses, and in-service programs. The target audience is current and prospective PreK-12 administrators, teachers, student teachers, and staff.
