Effective communication Team processes meetings performance management Dealing with change and team problems Current issues virtual teams globalization With its combined emphasis on principles and application interwoven with the tools topics and teams most relevant today Creating High Performance Teams is perfectly placed to equip upper level undergraduate and MBA students with the knowledge and skills necessary to take on teams in any situation Research Product - U.S. Army Research Institute for the Behavioral and Social Sciences ,1999 **Evaluating Team Performance** Interagency Advisory Group Committee on Performance Management and Recognition,2012-06-27 In September of 1992 the Interagency Advisory Group IAG Committee on Performance Management and Recognition established a working group of Federal agency representatives to research the issue of evaluating team performance This report and the accompanying annotated bibliography are the products of that working group After studying both public and private sector performance management systems the working group observed that a variety of approaches are used in interdependent work environments to assess team performance These approaches fall along a continuum ranging from completely individual focused approaches to team and or organization focused approaches A graph and matrix which depict the four benchmark approaches or models are included on pages iii and iv The report begins with an introduction to the focus continuum and includes an overview of components of assessment systems that apply to all the models Detailed chapters follow for each model outlining the specific characteristics the optimum organizational environment the cost of implementation factors and the advantages and disadvantages along with some examples of each Model 1 represents an individual focused approach to planning and assessment in a team setting and begins the continuum This model is very similar to traditional types of evaluation which may currently be in place in many organizations since this model uses only individual performance measurements to determine the final rating of the employee At this point on the continuum even though teams have been introduced into the organization most work is still independent the culture of the organization is still centered around the individual teams may only be used occasionally or are very informal and or the climate and structure of the organization lends itself to individual planning assessment and recognition rather than team or group assessment and recognition Model 2 represents a shift along the continuum towards a more team oriented approach but still focuses on individual performance The Model 2 approach introduces an element into employees appraisals addressing the individual s contribution to the team This model as well as Models 3 and 4 is supportive of employee involvement and high performance initiatives as found in Total Quality Management Total Quality Leadership or other programs which use teamwork as a process to improve organizational performance This model can be appropriate for organizations where the nature of the work is a combination of independent and interdependent tasks but where the culture and environment focus on individual accomplishment This approach can also be a beginning and supportive incremental step toward the long term strategic goal of the organization to move from an individual focused culture to a team focused one The Model 3 approach represents an attempt to link team

performance to individual performance by actually factoring the team's performance into the individual's performance rating. This is done by having at least one element of the individual's appraisal involve measurement of team performance, i.e., did the team meet its goals, did the team produce a quality product, does the team work well together. This approach may be used by organizations that use teamwork to accomplish a significant portion of the work that have well-developed teams or that for whatever reason want to enhance teamwork. Model 4 represents a completely organization-focused approach to planning and assessment as was practiced in the PACER SHARE demonstration project at McClellan Air Force Base in California and as promoted by Dr. W. Edwards Deming. This model lies at the end of the focus continuum with only the organization's performance evaluated.

Effective Team and Performance Management. Groupwork, Reflection, Learning Angela Moore, 2014-03-28 Seminar paper from the year 2011 in the subject Business economics Personnel and Organisation grade A University of Sheffield language English abstract The changing workplace and the strains that are inherent in organizations as a result of the increased responsibilities and little time make work stressful Organizational life becomes unbearable if individuals have to work independently to accomplish organizational goals This coupled with the increasing competition as a result of the globalized world makes it difficult for organizations to work basing on the efforts of a single individual Work has to be completed on time and reports have to be made that define the direction of the organization Individual effort and thinking is not so productive in this scenario necessitating the formation of groups or teams Workplace teams have made life easy for organizations with many of them now opting to use teams to carry out most of their tasks The advantages that teams bring to the organization cannot be overemphasized Those organizations that are still not using teams will always be left behind in this competitive environment The idea behind team formation is that it increases productivity and makes it easy for work to be done faster due to the

contributions that are made by many people Innovativeness and creativity in groups is high and thus people are able to share ideas that will eventually lead to a solution to a given organizational problem However not all people work well in groups or teams and this has also been another issue when dealing with teams Some people prefer autonomy in order to work better On the other hand it is also good to note that as much as these teams help organizations achieve results team formation and development is a difficult phenomenon and one that is faced with a myriad of problems The way these are solved determines that effectiveness of the group
