The Dance Partner:

The Dance Partner Diane Glancy, 2005 Diane Glancy sees books as being akin to maps and often finds the Native American voices she writes about as she travels Once when driving through western Nevada she stopped at Grant Mountain and Walker Lake where the Ghost Dance began and still lives There she found inspiration for *The Dance Partner* this outstanding collection of short stories that begins in the present jumps back to the time of the Ghost Dance goes further back to the Sioux Uprising and then moves forward again across 117 years of Plains Indian history The Ghost Dance was a late 19th century phenomenon among Native American groups in the West Followers believed that whites would disappear and that the oldways of living would return In fact Glancy s stories form a kind of Ghost Dance circling what is with what was and will be History is not in the past at all but has a presence in the present in a way that transforms the future In a culture where much has been erased forgotten or lost the fragments of what is known are woven with the possibilities of what could have been in a technique that is called ghosting Ghosting in writing presents voices that might have been alongside voices known to have been Glancy takes the words of Native Americans Porcupine and Kicking Bear along with those of ethnologist James Mooney and adds imagined voices The past roams into the present History comes down the road in many vehicles out of chronological order carnival trucks with different rides each setting up unreality in funhouse mirrors that distort them into new ways of seeing is true Glancy writes from a historical perspective and the imagination of what could have been In the end the Ghost Dance symbolizes the possibility of a rewritten life

The Hidden Power of Smell Paul A. Moore, 2015-08-27 The main purpose of the book is to provide insight into an area that humans often take for granted There are wonderful and exciting stories of organisms using chemical signals as a basis of

a sophisticated communication system In many instances chemical signals can provide more detailed and accurate information than any other mode of communication yet this world is hidden from us because of our focus on visual and auditory signals Although we have a diversity of senses available to us humans are primarily auditory and visual animals These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information We use sounds to communicate and music to excite or soothe us Our vision provides us with communication entertainment and information about our world Even though our world is dominated by other stimulus energies we have chosen in an evolutionary sense either auditory or visual signals to carry our most important information This is not the case for most other organisms Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals The world of communication using chemicals is an alien world for us We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life Part of this na vet about chemical signals is due to our cultural focus on visual and auditory signals but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings The popular press and popular writings virtually ignore the chemical senses especially in regard to their role or influence for humans and our human culture Academic books and textbooks are no better **Dennison's Party Magazine** ,1927
