

How Carlini's form only  
 seem to move  
 you and show  
 1971 in 1971 1971 in 1971  
 1971 in 1971

In the drawing Carlini shows you how to see the figure in terms of simple forms. He used blocks to study the torso and neck planes and the hip and knee planes. He has shown a light from the left and from above. Thus, if we were to try to put shade on the side and down planes, if he had drawn perfectly like the figure and put the same light and shade on them, they would have looked very odd.

Even if you look like figure, Carlini will show his movement of drawing. The line 141 suggests the top of the torso.

There is another principle easily illustrated here. As the artist moves his attention from one block like these to another, he notes the direction of each form. In other words, reference lines may be drawing such as such.
