cultural texts By exploring the culture of psychoanalysis Homans seeks a better understanding of what a psychoanalysis of culture might be Psychoanalysis Homans shows originated as a creative response to the withering away of traditional communities and their symbols in the aftermath of the industrial revolution The loss of these attachments played a crucial role in the lives of the founders of psychoanalysis especially Sigmund Freud but also Karl Abraham Carl Jung Otto Rank and Ernest Jones The personal political and religious losses that these figures experienced the introspection that followed and the psychological discovery that resulted are what Homans calls the ability to mourn Homans expands this historical analysis to construct a general model of psychological discovery the loss of shared ideals and symbols can produce a deeper sense of self psychological structure building or individuation and can then lead to the creation of new forms of meaning and self understanding He shows how Freud Jung and other psychoanalysts began to extend their introspection outward reinterpreting the meanings of Western art history and religion In conclusion Homans evaluates Freud's theory of culture and discusses the role that psychoanalysis might play in social and cultural criticism Throughout the book Homans makes use of the many histories biographies and psychobiographies that have been written about the origins of psychoanalysis drawing them into a comprehensive sociocultural model Rich in insights and highly original in approach this work will interest psychoanalysts and students of Freud sociologists concerned with modernity and psychoanalysis and cultural critics in the fields of religion anthropology political science and social history
