The Southern Circle:

The Gods' Machines Wun Chok Bong, 2008-05-27 Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements *The Gods' Machines* shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth's energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today's crop circles *The Gods' Machines* is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence

Stonehenge Mike Parker Pearson, 2023-04-06 Stonehenge is one of the world's most famous monuments Who built it how and why are questions that have endured for at least 900 years but modern methods of investigation are now able to offer up a completely new understanding of this iconic stone circle Stonehenge's history straddles the transition from the Stone Age to the Bronze Age though its story began long before it was built Serving initially as a burial ground it evolved over time into a sacred place for gathering feasting and building and was remodelled several times as different peoples arrived in the area along with new technologies and customs In more recent centuries it has found itself the centre of excavations political protests and even conspiracy theories embedding itself in the consciousness of the modern world In this book Mike Parker Pearson draws on two decades of research the results of recent excavations and cutting edge scientific analyses to uncover many of the secrets that this prehistoric stone circle has kept for 5 000 years In doing so he paints the most comprehensive picture yet of the history of Stonehenge from its origins up to the 21st century and reveals how in some ways trying to explain its power of attraction in the present is harder than explaining its purpose in the ancient past

Stonehenge Michael Parker Pearson, Stonehenge Riverside Project (England), 2012-06-07 Our knowledge about Stonehenge has changed dramatically as a result of the Stonehenge Riverside Project 2003 2009 led by Mike Parker Pearson and included not only Stonehenge itself but also the nearby great henge enclosure of Durrington Walls This book is about the people who built Stonehenge and its relationship to the surrounding landscape The book explores the theory that the people of Durrington Walls built both Stonehenge and Durrington Walls and that the choice of stone for constructing Stonehenge has a significance so far undiscovered namely that stone was used for monuments to the dead Through years of thorough and extensive work at the site Parker Pearson and his team unearthed evidence of the Neolithic inhabitants and

builders which connected the settlement at Durrington Walls with the henge and contextualised Stonehenge within the larger site complex linked by the River Avon as well as in terms of its relationship with the rest of the British Isles Parker Pearson's book changes the way that we think about Stonehenge correcting previously erroneous chronology and dating filling in gaps in our knowledge about its people and how they lived identifying a previously unknown type of Neolithic building discovering Bluestonehenge a circle of 25 blue stones from western Wales and confirming what started as a hypothesis that Stonehenge was a place of the dead through more than 64 cremation burials unearthed there which span the monument's use during the third millennium BC In lively and engaging prose Parker Pearson brings to life the imposing ancient monument that continues to hold a fascination for everyone
