The space shuttle Wayne McLoughlin, 1982 Lost American Projects: A Spacecraft Modellers Guide Mat Irvine, David Baker, 2024-02-26 Bring to life America's most amazing space projects that never were using highly illustrated step by step guides The major American space programmes that carried crews are well known From Mercury Gemini and Apollo in the 1960s and into the 1970s through to the 1980s Space Shuttle which made its final flight in 2011 they have all made their mark even the North American X 15 rocket plane that earned many of its pilots their Astronaut Wings owing to its high altitude capability All these involved a lot of new hardware including the Saturn rockets the Apollo craft and the Shuttle Orbiter with its solid fuel rocket boosters and giant external tank During this time of actual missions space scientists and engineers were also looking at how all these new techniques and hardware could be put to even greater use Many plans were devised artwork drawn and technical models produced to illustrate the proposals However none were ever built and certainly none ever flew This book looks at what could have been and how they can be built as models to display alongside those that did actually fly Lost American Projects A Spacecraft Modeller's Guide is a follow on to Mat Irvine's earlier book Scale Spacecraft Modelling

vision was shattered less than six months later when on January 13 1970 NASA Administrator Dr Thomas Paine announced that owing to funding cuts only the reusable Space Shuttle could be afforded there would be no space station no return to the Moon and no missions to Mars This is a story never before told about the missions and technologies that NASA had begun to plan but never fully realized The book is a companion to the author's previous two works on the Space Shuttle Whereas the first two books showed how the Space Shuttle flew in space and what the program accomplished this book explains what more the Space Shuttle could have achieved and how the space transportation system could have further matured if circumstances had been otherwise A final chapter also discusses how some of these plans might be resurrected in future programs
