Cunningham,2017-11-24 Excerpt from Thought and Reality in Hegel s System The first chapter of this study was read in part  
before the meeting of the American Philosophical Association at Cornell University in December 1907 Subsequently it was  
published in an expanded form in The Philosophical Review vol XVII pp 619 under the title The Significance of the Hegelian  
Conception of Absolute Knowledge My thanks are due to the editor of the Review for his permission to reprint it here

Gustavus Watts Cunningham,2017-07-18 From the PREFACE Perhaps it would not be an exaggeration to say that there is no  
system of thought more intimately bound up with one fundamental principle than is the system of Hegel Even a cursory  
reading of his works is sufficient to convince one that the doctrine of the Notion whatever it may be is basic to the system  
and a more detailed study only forces the conviction home In the Phenomenology in the Encyclopedia in the History of  
Philosophy in the Philosophy of Religion everywhere it is this doctrine of the Notion upon which emphasis is laid Indeed if  
one were to say that the entire system is just the explication of this doctrine its elaboration by definition and application one  
would be well within the bounds of justification A correct interpretation of the system consequently depends upon a thorough  
comprehension of the doctrine of the Notion if this doctrine is neglected the system must remain a sealed book The aim of  
the present monograph is to set forth this doctrine of the Notion to emphasize its importance for a theory of knowledge and  
in the light of it to give some insight into Hegel s conception of ultimate reality The first chapter of this study was read in  
part before the meeting of the American Philosophical Association at Cornell University in December 1907 Subsequently it  
was published in an expanded form in The Philosophical Review Vol XVII pp 619 642 under the title The Significance of the  
Hegelian Conception of Absolute Knowledge My thanks are due to the editor of the Review for his permission to reprint it

CHAPTER V The Personality Of The Absolute Hegel's doctrine of the nature of the Absolute is a problem that is not easy of solution The fact that the Hegelians of the Left and of the Right while appealing to the authority of the master in justification of their respective positions reached antithetical conclusions with reference to this problem is an indication of its difficulty But the result that we have already attained in the preceding chapter offers us a vantage point in our discussion of the problem We have shown that the unity of reality according to Hegel is a unity that includes differences and that the differences are essential to the unity This point will however be of more direct interest to us when we come to ask concerning the relation of the Absolute and its differentiations The problem immediately before us is to determine how this unity must be conceived what more specifically the nature of the unity is The thesis which we shall defend is that the Hegelian doctrine concerning this unity is that it is spiritual and that it exists as a self-conscious Personality 1 The point of departure for our discussion we shall find in the Absolute Idea If we can determine the essential nature of the Idea then we may claim to have set forth Hegel's doctrine of the nature of the Absolute since the two terms are practically synonymous in his system 2 If Hegel has given any direct proof at all that the Absolute is to be thought of as personal it must be sought in an investigation of the Idea and on the other hand if it can be shown that the Idea is a self-conscious Individuality it must be admitted that Hegel teaches the doctrine of a personal I I use the term personality as synonymous with selfhood or *The New International Encyclopaedia* Frank Moore Colby,Talcott Williams,1929 [An Introduction to Bradley's Metaphysics](#) W. J. Mander,1994 F H Bradley was the greatest of the British Idealists but for much of this century his views have been neglected primarily as a result of the severe criticism to which they were subjected by Russell and Moore In recent years however there has been a resurgence of interest in and a widespread reappraisal of his work W J Mander offers a general introduction to Bradley's metaphysics and its logical foundations and shows that much of his philosophy has been seriously misunderstood Dr Mander argues that any adequate treatment of Bradley's thought must take full account of his unique dual inheritance from the traditions of British empiricism and Hegelian rationalism The scholarship of recent years is assessed and new interpretations are offered of Bradley's views about truth predication and relations and of his arguments for idealism This book is a clear and helpful guide for those new to this difficult but fascinating thinker and at the same time an original and stimulating contribution to the re-evaluation of his work *Thought and Reality in Hegel's System - Primary Source Edition* Gustavus Watts Cunningham,2013-10 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We

appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book
