Teachers In Control Cracking The Code:

Teachers in Control Martin Powell, Jonathan Soly, 2019-11-15 In an increasingly centralized education system how can teachers recover the freedom to make their own decisions Originally published in 1990 the teaching profession had seldom been under greater pressure *Teachers in Control* aimed to help teachers to understand the forces that shaped their personal and professional development and their relationships with children at the time It identifies the pressures that teachers faced from both the school and the educational system as a whole and then examines the internal psychological influences that lead people into teaching and direct their future careers The authors argue that an understanding of these influences can give teachers more control of decisions that affect their practice in the classroom and will still be very relevant today

Organizing For Learning In The Primary Classroom Moyles, Janet, 1992-12-01 The primary classroom is the context in which a wide range of teaching and learning experiences occur and not just for the children What is it that underlies classroom organization routines rules structures and daily occurrences What are the prime objectives and what influences the decisions of teachers and children What is it useful for teachers to consider when contemplating the issues of classroom management and organization What do different practices have to offer *Organizing for Learning in the Primary Classroom* explores the whole range of influences and values which underpin why teachers do what they do in the classroom context and what these mean to children and others Janet Moyles draws on several different research findings to examine the evidence in relation to the underlying issues of teachers beliefs and values She examines teaching and learning styles children s independence and autonomy coping with children s differences the physical classroom context and resources time management and ways of involving others in the day to day organization Practical suggestions are given for considering both the functional and aesthetic aspects of the classroom context Opportunities are provided for teachers to reflect on their own organization and also consider innovative and flexible ways forward to deal with new and ever increasing demands on their time and sanity

Empowering Ourselves and Transforming Schools Judith W. Irwin, 1996-09-12 In this readable and ground breaking text Irwin examines the forces that keep educators and students from feeling fully empowered She defines empowerment as gaining the power to self actualize and to facilitate this for others Grounding her arguments in feminist and critical examinations of domination Irwin begins by defining empowerment as fundamentally opposed to domination She then examines the implications of this definition for our educational system This book encourages the reader to consider new directions for educational reform and synthesizes current innovations under the umbrella philosophy of empowerment suggesting how the change from the patriarchal paradigm to one based on cooperation and connection might revolutionize the organization of schools and their classrooms The reader is challenged to develop his or her own philosophy and agenda for change through a series of reflective activities A comparative case study of five empowered teachers is included to demonstrate that empowerment is an individual as well as a collective process
