The Red Team Handbook - The Army's Guide to Making Better Decisions University of Foreign Military and Cultu, University of University of Foreign Military and Cultural Studies, 2019-11-20 Chief of Staff of the U S Army General Mark A Milley repeatedly warns of increased complexity ambiguity and speed in future warfare The decision making process at all levels of command will be challenged by the environment the situation and the enemy as well as by the perception and interpretation of our thoughts The requirement to frame decisions around the scope and rate of information sharing on the modern battlefield and adapting those frames to the complexity of context and content necessitates the ability to think critically and creatively The curriculum at the University of Foreign Military and Cultural Studies UFMCS directly addresses these challenges by training and preparing students to operate as a Red Teamer Red Teaming creates and illuminates pathways to better decisions by employing structured techniques to identify hidden dangers reveal unseen possibilities and facilitate creative alternatives It is in essence a form of risk management for the human brain The U S Army chartered UFMCS with the mission to teach Red Teaming to the U S Army and other authorized organizations As the nature of warfare has evolved so too has our curriculum and academic offerings Version 9 0 of the Red Team Handbook represents the current state of our program Although the contents of this volume and our courses are not official doctrine the practices discussed directly support and are in both Joint and U S Army Doctrine This handbook provides the reader with an introduction to the fundamental concepts methods and

The Radical Team Handbook John C. Redding, 2000-10-09 As marketplace competition heats up corporations are scrambling for ways to meet greater time and innovation demands Project teams have become the primary tool through which organizations plan and implement their most critical business initiatives But organizations are finding that traditional approaches to teamwork are no longer adequate for meeting demands fundamentally different from those that teams were assigned to in the past This work aims to give readers tools for implementing a radical new team style based on team learning whereby a step by step logical approach gives way to a non linear cyclical exploration and harmony is supplanted by disagreement **War and the Politics of Ethics** Maja Zehfuss, 2018-02-02 Contemporary Western war is represented as enacting the West s ability and responsibility to help make the world a better place for others in particular to protect them from oppression and serious human rights abuses That is war has become permissible again indeed even required as ethical war At the same time however Western war kills and destroys This creates a paradox Western war risks killing those it proposes to protect This book examines how we have responded to this dilemma and challenges the vision of ethical war itself exploring how the commitment to ethics shapes the practice of war and indeed how practices come in turn to shape what is considered ethical in war The book closely examines particular practices of warfare such as targeting the use of cultural knowledge and ethics training for soldiers What emerges is that instead of constraining violence the commitment to ethics enables and enhances it The book argues that the production of ethical war relies on an impossible but obscured separation between ethics and politics that is the problematic politics of ethics and reflects on the need to make decisions at the limit of ethics
