Porter, Alexis T. Boutin, 2014-12-02 Remembering the Dead in the Ancient Near East is among the first comprehensive treatments to present the diverse ways in which ancient Near Eastern civilizations memorialized and honored their dead using mortuary rituals human skeletal remains and embodied identities as a window into the memory work of past societies In six case studies teams of researchers with different skillsets osteological analysis faunal analysis culture history and the analysis of written texts and artifact analysis integrate mortuary analysis with bioarchaeological techniques Drawing upon different kinds of data including human remains ceramics jewelry spatial

analysis and faunal remains found in burial sites from across the region's societies the authors paint a robust and complex picture of death in the ancient Near East Demonstrating the still underexplored potential of bioarchaeological analysis in ancient societies Remembering the Dead in the Ancient Near East serves as a model for using multiple lines of evidence to reconstruct commemoration practices It will be of great interest to students and scholars of ancient Near Eastern and Egyptian societies the archaeology of death and burial bioarchaeology and human skeletal biology Behaviour Behind Bones Sharyn Jones O'Day, Wim Van Neer, Anton Ervynck, 2003-12-01 This book is the first in a series of volumes which form the published proceedings of the 9th meeting of the International Council of Archaeozoology ICAZ held in Durham in 2002 The 35 papers present a series of case studies from around the world They stretch beyond the standard zooarchaeological topics of economy and ecology and consider how zooarchaeological research can contribute to our understanding of human behaviour and social systems The volume is divided into two parts Part 1 Beyond Calories focuses on the zooarchaeology of ritual and religion Contributors discuss ways to approach questions of ritual and religion through the faunal record and consider how material culture depicting and or associated with animals can provide clues about ideology religious practices and the role of animals within spiritual systems Part 2 Equations for Inequality looks at questions of identity status and other forms of social differentiation in former human societies Contributors discuss how differences in food consumption nutrition and food procurement strategies can be related to various forms of social differentiation among individuals and groups

The Death Pit Charles R. Pike, 1980-01-01 **Doctor Who: The Death Pit (Time Trips)** A.L. Kennedy, 2013-12-05 Something odd is going on at the Fetch Brothers Golf Spa Hotel Receptionist Bryony Mailer has noticed a definite tendency towards disappearance amongst the guests She's tried talking to the manager she's even tried talking to the owner who lives in one of the best cottages in the grounds but to no avail And then a tall loping remarkably energetic guest wearing a fetching scarf and floppy hat appears The Fourth Doctor thinks he's in Chicago He knows he's in 1978 And he also knows that if he doesn't do something very clever very soon matters will get very very out of hand *Antiquities of Ur* Leonard Woolley, 1929 **All about Hawaii**, 1930 The Man Trap Joseph Allan Dunn, 1921 **Body Parts and Bodies Whole** Katharina Rebay-Salisbury, Marie Louise Stig Sørensen, Jessica Hughes, 2010 This volume grew out of an interdisciplinary discussion held in the context of the Leverhulme funded project Changing Beliefs in the Human Body through which the image of the body in pieces soon emerged as a potent site of attitudes about the body and associated practices in many periods Archaeologists routinely encounter parts of human and animal bodies in their excavations Such fragmentary evidence has often been created through accidental damage and the passage of time nevertheless it can also signify a deliberate and meaningful act of fragmentation As a fragment a part may acquire a distinct meaning through its enchainment relationship to the whole or alternatively it may be used in a more straightforward manner to represent the whole or even act as stand in for other variables This collection of papers puts bodily fragmentation into a long term historical perspective The

temporal spread of the papers collected here indicates both the consistent importance and the varied perception of body parts in the archaeological record of Europe and the Near East By bringing case studies together from a range of locations and time periods each chapter brings a different insight to the role of body parts and body wholes and explores the status of the body in different cultural contexts Many of the papers deal directly with the physical remains of the dead body but the range of practices and representations covered in this volume confirm the sheer variability of treatments of the body throughout human history Every one of the contributions shows how looking at how the human body is divided into pieces or parts can give us deeper insights into the beliefs of the particular society which produced these practices and representations
