Thoughts About Architecture:

Christian Thought in Architecture Barr Ferree, 1892 *Postphenomenology and Architecture* Inger Berling Hyams, Lars Botin, 2021-02-22 Architecture and urban design are typically considered as a result of artistic creativity performed by gifted individuals Postphenomenology and Architecture Human Technology Relations in the Built Environment analyzes buildings and cities instead as technologies Informed by a postphenomenological perspective this book argues that buildings and the furniture of cities like bike lanes benches and bus stops are inscribed in a conceptual framework of multistability which is to say that they fulfill different purposes over time Yet there are qualities in the built environment that are long lasting and immutable and that transcend temporal functionality and ephemeral efficiency The contributors show how different perceptions practices and interpretations are tangible and visible as we engage with these technologies In addition several of the chapters critically assess the influence of Martin Heidegger in modern philosophy of architecture This book reads Heidegger from the perspective of architecture and urban design as technology shedding light on what it means to build and dwell Architecture ,1904 **The Builder** ,1884 *Architecture and the Unconscious* John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition **Thoughts about Architecture** Jacob B.
