The Thinking Machine Charles Judson Herrick,1929 This is a book about the natural history of human nature It is not a book about philosophy for philosophers It is a plain and straightforward statement for ordinary people of what another very ordinary sort of man who has considerable experience with the mechanisms of human life and how they work thinks about it all We all want to understand human nature better because it is our nature The better we understand it the more likely we are to get along with ourselves our neighbors and our surroundings in general We want to make life more worth while to get as much out of it as we can and to put as much into it as we can to make a better living and to have as much fun doing it as possible We need to know how we live what the apparatus of life is and how it works in order to make a better job of it Preface
