Altering Party Systems Simon Hug, 2010-05-06 New political parties have regularly appeared in developed democracies around the world. In some countries issues focusing on the environment, immigration, economic decline, and regional concerns have been brought to the forefront by new political parties. In other countries, these issues have been addressed by established parties, and new issue-driven parties have failed to form. Most current research is unable to explain why, under certain circumstances, new issues or neglected old ones lead to the formation of new parties. Based on a novel theoretical framework, this study demonstrates the crucial interplay between established parties and possible newcomers to explain the emergence of new political parties. Deriving stable hypotheses from a simple theoretical model, the book proceeds to a study of party formation in twenty-two developed democracies. New or neglected issues still appear as a driving force in explaining the emergence of new parties, but their effect is partially mediated by institutional factors such as access to the ballot, public support for parties, and the electoral system. The hypotheses, in part, support existing theoretical work but in part present new insights. The theoretical model also pinpoints problems of research design that are hardly addressed in the comparative literature on new political parties. These insights from the theoretical model lead to empirical tests that improve on those employed in the literature and allow for a much enhanced understanding of the formation and the success of new parties.

Postopera: Reinventing the Voice-Body Jelena Novak, 2016-03-09 Both in opera studies and in most operatic works, the singing body is often taken for granted. In *Postopera: Reinventing the Voice-Body*, Jelena Novak reintroduces an awareness of the physicality of the singing body to opera studies. Arguing that the voice-body relationship itself is a producer of meaning, she furthermore posits this relationship as one of the major driving forces in recent opera. She takes as her focus six contemporary operas: *La Belle et la Bête* by Philip Glass, *Writing to Vermeer* by Louis Andriessen, *Peter Greenaway Three Tales* by Steve Reich, *Beryl Korot One Michel van der Aa Homeland* by Laurie Anderson, and *La Commedia* by Louis Andriessen. Hal Hartley, which she terms *postoperas*. These pieces are sites for creative exploration where the boundaries of the opera world are stretched. Central to this is the impact of new media: a desynchronization between image and sound, or a redefinition of body-voice-gender relationships. Novak dissects the singing body as a set of rules, protocols, effects, and strategies. That dissection shows how the singing body acts within the world of opera, what interventions it makes, and how it constitutes opera's meanings. **Jack and Three Jills** Francis Charles Philips, 1888. *The Coryston Family* Hugh Walpole, 1913. **The professor's experiment** Margaret Wolfe Hungerford, 1896. Situating Opera Herbert Lindenberger, 2010-10-28. Setting opera within a variety of contexts: social, aesthetic, historical. Lindenberger illuminates a form that has persisted in recognizable shape for over four centuries. The study examines the social entanglements of opera, for example, the relation of

Mozart's *Abduction from the Seraglio* and Verdi's *Il trovatore* to its initial and later audiences. It shows how modernist opera rethought the nature of theatricality and often challenged its viewers by means of both musical and theatrical shock effects. Using recent experiments in neuroscience, the book demonstrates how different operatic forms developed at different periods to create new ways of exciting a public. Lindenberger considers selected moments of operatic history from Monteverdi's *Orfeo* to the present to study how the form has communicated with its diverse audiences. Of interest to scholars and operagoers alike, this book advocates and exemplifies opera studies as an active, emerging area of interdisciplinary study.
