Understanding History Two

Paul Janet, Gabriel Séailles

Understanding History Two:

Understanding History Teaching Chris Husbands, Alison Kitson, Anna Pendry, 2003-09-16 *Understanding History Teaching* is an enjoyable read with a logical and flowing structure. It lives up to its goal of appealing to both academic and professional readers with both academic depth and real insights and opportunities for the professional teacher to draw from. It presents its data and interpretations in a manner which does not avoid the issues revealed within the research but has an uplifting effect on the reader and leaves them feeling optimistic about the quality of History teaching in UK secondary schools. Robert Wyness, Student De Montfort University Leicester, UK. Why do we teach and learn about the past? How is history taught in schools? What are the influences on the way teachers teach and pupils learn about the past? History is one of the most ideologically disputed of school subjects. Over the past generation, the subject has experienced fundamental changes in content, pedagogy, and approach. This book is the first detailed account of the way history is taught in schools to be published for 30 years. Drawing on fieldwork in comprehensive schools and on research studies worldwide, the authors pose fundamental questions about the way teachers teach and learners learn. They consider its purposes on teaching about the past in a world of accelerating change. The book sets out to explore the realities of classroom history teaching and to offer pointers for the development of the subject in a new century.

Understanding History Ros Ashby, Professor Peter Gordon, Peter Lee, 2004-08-02 What sense do children and young people make of history? How do they cope with competing historical accounts in textbooks? How do they think historical or archaeological claims are supported or rejected? And whatever students think about history, how do their teachers see history education? The contributors to this fourth volume of the *International Review of History Education* discuss these questions in the context of their research. Divided into two sections, the first part of the book examines students' ideas about the discipline of history and the knowledge it produces. The second part looks in detail at teachers' own ideas about teaching. Featuring contributions from authors throughout the world, including the USA, Canada, Portugal, Brazil, Taiwan, and the UK, the book provides interesting studies of how history is both taught and received in these different countries. *Understanding History* contributes to current knowledge of successful teaching that teachers must take into account: students' preconceptions that they bring to the classroom, as well as accepting the complexity and importance of their own professional knowledge. The book will be of interest to anyone studying or researching history education, as well as teachers of history throughout the world.
