## **Understanding Islamic Architecture:**

*Understanding Islamic Architecture* Attilo Petruccioli, Khalil K. Pirani, 2013-09-13 The ongoing debate among practitioners and in academia about the meaning and understanding of Islamic architecture will be energized by this book. It contains essays by architects and academics from various parts of the world which clarify how the various disciplines of the design profession can be employed to build in the spirit of Islam. Divided into three sections, the book covers meaning from Faith which draws meaning from the Islamic faith in order to propose a built environment that is universally beneficial; analysis of History which examines historical buildings and planning concepts and suggests how to apply lessons learned to contemporary practice; contemporary Trends which discusses current trends in architecture education and socio-economic aspects of various Muslim countries. Illustrated throughout, this book will appeal to students and scholars practising architects and planners alike.

**Making Sense of Islamic Art & Architecture** Adam Barkman, 2015. *Making Sense of Islamic Art Architecture* is designed to equip the cultural tourist and art student with the means to interpret paintings, buildings or artefacts in terms of the iconography and symbolism of Islam. With reference to 100 clearly illustrated and diverse historical works, readers will learn to identify the telling details that mean so much to Muslims. The book's layout is both visually striking and accessible. Each double-page spread features a full-page colour photograph of either a detail of the work or its context, depending on the subject, with a second photograph chosen to illustrate important aspects of the work. Alongside is a detailed exposition of the work's significance in Islamic art history and philosophy, with key historical facts about the work, including where it may be seen today. By tracing the paths between Islamic belief and artistic intention, this book will deepen understanding not only of Islamic art and architecture but also of Islam itself.

Amjad Bohumil Prochazka, 1986. *Understanding Islam* Frithjof Schuon, 1976. Islam confronts what is immutable in God with what is permanent in man.

*Islamic Architecture on the Move* Christiane J. Gruber, 2016. Even a casual observer can spy traces of Islamic architecture and design on buildings all over the world, a reminder that artistic traditions and visual culture have never been limited to their region or country of origin but rather are highly diffusible. This book brings together scholars from architectural studies, design, art history, and other fields to challenge and expand concepts of Islamic architecture. Ranging from eighteenth-century Ottoman tents to manifestations of Islamic motifs in 1960s Hawaii, this richly illustrated volume raises key questions about Islamic architecture and more broadly about how we can rethink our understanding of material, artistic, and cultural mobility in the modern world.
