Civic Education for Diverse Citizens in Global Times Beth C. Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical

understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory *Social Studies for the Twenty-First Century* Jack Zevin,2013-08-21 *Social Studies for the Twenty First Century Third Edition* weaves theory curriculum methods and assessment into a comprehensive model to guide middle and secondary teachers in setting objectives planning lessons units and courses choosing classroom strategies and constructing tests for some of the field s most popular and enduring programs It offers practical interesting exciting ways to teach social studies and a multitude of instructional and professional resources for teachers The text includes separate chapters on teaching each of the major areas of the social studies curriculum Its reflective and integrative framework emphasizes building imagination insight and critical thinking into everyday classrooms encourages problem solving attitudes and behavior and provokes analysis reflection and debate Throughout the text all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic factual reflective analytical and affective judgmental components These three components are seen as supporting one another building the groundwork for taking stands on issues past and present At the center is the author s belief that the heart and soul of social studies instruction perhaps all teaching lies in stimulating the production of ideas looking at knowledge from others viewpoints and formulating for oneself a set of goals values and beliefs that can be explained and justified in open discussion New in the Third Edition Summaries of recent research particularly in history education that have been published since the last edition Increased attention to social studies standards as well as those for civics economics and history An enriched view of teaching history and social studies with a wide array of sources ranging from material objects through primary sources on to art music and literature Tightening of the text to make it shorter and more pointed including a few provocative new ideas More and better organized ideas for classroom group and individual activities and cooperative learning Expanded appendices on instructional resources include the rapidly growing use of websites New visuals that are better integrated into the text and which teachers can use in their classrooms as lessons in visual literacy and Continued efforts to inject a bit of humor and self criticism into a field of education most students view as a sizeable trunk of dead and deadly facts *Social Studies for the Twenty First Century Third Edition* is a primary text for secondary and middle social studies methods courses *Contemporary Social Studies* William B. Russell III,2011-12-12 *Contemporary Social Studies An Essential Reader* explores the complex and diverse field of social studies addressing contemporary issues and encouraging critical thinking Written by prominent scholars this collection provokes readers to reconsider the current state of social

Lund, Paul R. Carr, 2008 In this provocative collection of essays with a distinctly critical and nuanced approach to how democracy is taught learned understood and lived authors from four continents share their visions on how democracy needs to be cultivated critiqued demonstrated and manifested throughout the educational experience The collective concern is how we actually do democracy in education The essays argue that democracy must be infused in everything that happens at school curriculum extra curricular activities interaction with parents and communities and through formal organization and structures One of the book s central questions is Are educators merely teaching students skills and knowledge to prepare them for the world of work or is education more about encouraging students to thrive within a pluralistic society This book reveals that democracy is an ethos an ideology a set of values a philosophy and a complex and dynamic terrain that is a contested forum for debate From seasoned veterans to emerging scholars these writers challenge the idea that there is only one type of democracy or that democracy is defined by elections Using a range of theoretical conceptual and methodological approaches each essay makes a compelling case for how education can advance a more critical engagement in democracy that promotes social justice and political literacy for all Diverse examples illustrate the theme of doing democracy With its numerous models for teaching and learning to encourage critical thinking and engagement this book is certain to be an invaluable resource to educators researchers students and anyone with a passion for democratic ideals *Making Citizens* Ramona Maria Fruja, 2010 **Comparative Education** Patricia K.
