Building an Emerald City Lucia Athens, 2012-06-22 In 2000 Seattle Washington became the first U.S. city to officially adopt the U.S. Green Building Council's LEED Leadership in Energy and Environmental Design Silver standards for its own major construction projects In the midst of a municipal building boom it set new targets for building and remodeling to LEED guidelines Its first LEED certified project the Seattle Justice Center was completed in 2002 The city is now home to one of the highest concentrations of LEED buildings in the world *Building an Emerald City* is the story of how Seattle transformed itself into a leader in sustainable green building written by one of the principal figures in that transformation It is both a personal account filled with the experiences and insights of an insider and a guide for anyone who wants to bring about similar changes in any city It includes best practice models from municipalities across the nation supplemented by the contributions of guest authors who offer stories and tips from their own experiences in other cities Intended as a roadmap for policy makers public officials and representatives large scale builders and land developers and green advocates of every stripe *Building an Emerald City* is that rare book one that is both inspirational and

practical **Marketing Green Buildings** Jerry Yudelson,2020-12-17 Engineers architects and contractors seeking to expand their involvement in the green buildings market need a firm grounding in the marketing strategies and tactics which are being used most successfully in this specialized and growing field This book is intended to serve as an effective tool for professional green building enthusiasts and advocates in presenting green design features sustainable strategies and new products to the potential green building client The author addresses key questions such as How is green building marketing different from other types of professional service marketing What tools and techniques from conventional marketing can be used to greater effect in marketing green buildings What is the size and potential of the green buildings market And how should a firm position itself to succeed in this growing marketplace You ll find clear descriptions of successful strategies and approaches to marketing and selling green building related services as well as up to date information on the role of LEED in green building projects **The Complete Guide to Green Building & Remodeling Your Home** Martha Maeda,2011 In today s economy and socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources will be used up within the next fifty years it is especially necessary for young families to consider the implications of re examining their homes and living situations to be more green This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades You will learn why people have started to build green and how it can be done in today s regulatory and cost conditions quickly and inexpensively You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials plans and paperwork you need to proceed You will learn which materials are best for green building by lifespan and how to choose between various green materials You will learn how to not only use green materials but to make sure the construction process is green as well You will learn the basics of framing your building natural building methods the energy systems you might use and the heating cooling options at your disposal Construction and environmental experts have been interviewed and their expertise is included in this book to help you learn everything you need to accomplish the above as well as to know what kinds of water and waste systems are best how to site plan and landscape your home and what the most common myths about green building are You will learn ten things you can do on any building project to keep it green and any materials you should always have on hand for anything you do around the house Regardless of whether you are just looking to remodel to make your house greener or are building a new home this book will give you everything you need to stay green and respect the environment with your home **Green Building Guide** Austin (Tex.). Environmental and Conservation Services

Department,1992 **Green Building Guidelines** Sustainable Buildings Industry Council,2004 Green Building Guidelines Meeting the Demand for Low Energy Resource Efficient Homes was developed by a committee of builders both members and non members of NAHB architects building scientists product manufacturers and others over a 21 2 year period 19982001 Their work was supported by DOE's Building America Program through the National Renewable Energy Laboratory The manual is published by the Sustainable Buildings Industry Council and is used in a workshop or seminar setting or as a stand alone document It is a brief simple to read builder friendly text that is applicable to homebuilders anywhere across the nation who are interested in exploring the notion of rethinking some of the design issues in their current product The Green Building Guidelines manual is now in its fourth edition It has been updated and reorganized a bit to make topics easier to find Weve also added two new sections The Whole Building Approach and The Building Envelope The Guidelines are intended to be national in scope and as a result the construction information and example details may not fit all climates or circumstances The text has been organized to acquaint the reader with basic concepts and provide resources where more detailed information can be located At the end of each section readers find Interactions references to other sections of the book that describe design strategies systems components or materials that interact in important ways with the topic of the chapter The New Ecological Home Daniel D. Chiras,2004 Today a new generation of architects and builders is emerging intent on creating homes that meet human needs for shelter while causing only a fraction of the environmental impact of conventional housing The New Ecological Home provides an overview of green building techniques materials products and technologies that are either currently available or will be in the near future Author Daniel Chiras provides a wealth of up to date practical information for home buyers owner builders and anyone interested in building for a sustainable future

Becoming a Green Building Professional Holley Henderson,2012-08-03 A career guide for professionals in sustainable architecture design planning development and related consulting For those considering a new career or a career change focused on green and sustainable building and design *Becoming a Green Building Professional* offers practical information on educational requirements career options guidance and tips and first hand interviews with green building professionals Perfect for underemployed architects and other building and design professionals who want to reinvent and renew their careers as well as students considering such a career this is a vital and informative guide to a growing field **A**

Beginner's Guide to Green Building ,2005 **Green Building Guidelines** ,2004-01-01 Book features Forward Contents Builder s Matrix The information in this book was developed primarily for home builders but others will find it useful The book is intended to be national in scope so all of the construction information and examples are not relevant for all climates At the end of each section readers will find Interactions references to other sections of the book that describe design strategies systems components or materials that interact in important ways with the topic of the chapter **Understanding**
Green Building Guidelines: For Students and Young Professionals Traci Rose Rider,2010-02-17 Summarizes the main

issues and strategies of the forceful and fast paced green building movement Many professions are increasingly producing tools to assist clients in breaking down and understanding the different elements that reside under the umbrella of the sustainability movement For the design and construction professions this unpacking often takes the form of green building guidelines and rating systems This book aims to look at a selection of both national and local green building rating systems and guidelines ranging from commercial to residential While the goal is to provide students and young professionals with a solid overview of each product enabling them to understand the differences and select the most appropriate system for their chosen projects the book provides valuable overviews and comparisons for anyone interested in better buildings designers homeowners realtors contractors facility managers site designers and more *Green Building Guidance* Karthik Karuppu, NVICO,2019-02-07 Conventional buildings don t have sustainability because of the approach of designing and the construction method The total energy consumption calculates for all buildings account for up to 40% in India and commercial and residential real estate combined will account for more than 2000 TWH of energy consumption by 2030 India has an expected energy deficit of around 12% which is one of the major hurdles for the government This will result in a further increase in electrification in all areas Green buildings utilize fewer resources and are healthier to live in They offer significant operational cost savings compared with conventional buildings In effect green homes can expect a 14 percent savings in operational costs over five year savings for new green buildings and 13 percent savings in operational costs over five years for green retrofit and renovation projects Building owners also report that green buildings whether new or renovated give a 7 percent increase in asset value over conventional buildings Green Building Anthony C. Floyd,Allan Bilka,2012 The cutting edge green building projects of today are quickly becoming standard practice for tomorrow In order for industry professionals to keep up with this trend they ll need to have a solid grasp on green building and the technologies market forces and governmental policies that drive it *Green Building A Professional s Guide to Concepts Codes and Innovation* is designed for those seeking a better understanding of current design and building performance issues Coverage includes straightforward explanations of how buildings and ecosystems can work together as well as the sustainability concerns inspiring current regulations Relevant codes and standards are discussed in depth with particular attention to the International Green Construction Code Knowledge is essential for environmentally appropriate and efficient building solutions Readers of this book will have a better understanding of where the building industry is headed and how to become compliant with green practices and regulations Check out our app DEWALT Mobile Pro TM This free app is a construction calculator with integrated reference materials and access to hundreds of additional calculations as add ons To learn more visit dewalt.com/mobilepro The Integrative Design Guide to Green Building 7group,Bill Reed,2009-04-13 The members of 7group and Bill Reed are examples writ large of the kind of leadership that is taking this idea of green building and forming it into reality by helping change minds building practice and design process from the Foreword by S Rick Fedrizzi President

CEO and Founding Chair U S Green Building Council A whole building approach to sustainability The integrative design process offers a new path to making better green building decisions and addressing complex issues that threaten living systems In *The Integrative Design Guide to Green Building Redefining the Practice of Sustainability* 7group s principals and integrative design pioneer Bill Reed introduce design and construction professionals to the concepts of whole building design and whole systems With integrative thinking that reframes what sustainability means they provide a how to guide for architects designers engineers developers builders and other professionals on incorporating integrative design into every phase of a project This practical manual Explains the philosophy and underpinnings of effective integrative design addressing systems thinking and building and community design from a whole living system perspective Details how to implement integrative design from the discovery phase to occupancy supported by process outlines itemized tasks practice examples case studies and real world stories illustrating the nature of this work Explores the deeper understanding of integration that is required to transform architectural practice and our role on the planet This book both practical and thoughtful will help you deliver your vision of a sustainable environment *Green Building and Sustainable Development* Jonathan E. Furr,2009

The legal and economic landscape for building and development have fundamentally been altered by the country s major environmental problems climate change deforestation loss of biodiversity ozone depletion pollution and unsustainable natural resource consumption rates The editors provide practical information for lawyers to assist their clients in fully understanding green building and sustainable development concepts so they can operate successfully in the evolving economic and regulatory environment while minimizing the potential cost penalty of business as usual practices **Green Building 101** Allison Friedman,Kasia Gallo,2009
