Multilevel Network Analysis for the Social Sciences Emmanuel Lazega,Tom A.B.

Snijders,2015-12-16 This volume provides new insights into the functioning of organizational managerial and market societies Multilevel analysis and social network analysis are described and the authors show how they can be combined in developing the theory methods and empirical applications of the social sciences This book maps out the development of multilevel reasoning and shows how it can explain behavior through two different ways of contextualizing it First by identifying levels of influence on behavior and different aggregations of actors and behavior and complex interactions between context and behavior Second by identifying different levels as truly different systems of agency such levels of agency can be examined separately and jointly since the link between them is affiliation of members of one level to collective actors at the superior level It is by combining these approaches that this work offers new insights New case studies and datasets that explore new avenues of theorizing and new applications of methodology are presented This book will be useful as a reference work for all social scientists economists and historians who use network analyses and multilevel statistical analyses Philosophers interested in the philosophy of science or epistemology will also find this book valuable

Challenges in Social Network Research Giancarlo Ragozini,Maria Prosperina Vitale,2019-12-06 The book includes both invited and contributed chapters dealing with advanced methods and theoretical development for the analysis of social networks and applications in numerous disciplines Some authors explore new trends related to network measures multilevel networks and clustering on networks while other contributions deepen the relationship among statistical methods for data mining and social network analysis Along with the new methodological developments the book offers interesting applications to a wide set of fields ranging from the organizational and economic studies collaboration and innovation to the less usual field of poetry In addition the case studies are related to local context showing how the substantive reasoning is fundamental in social network analysis The list of authors includes both top scholars in the field of social networks and promising young researchers All chapters passed a double blind review process followed by the guest editors This edited volume will appeal to students researchers and professionals

Connections ,1995 *Social Network Analysis in Program Evaluation* Maryann M. Durland,Kimberly A. Fredericks,2006-02-10 The application of social network analysis SNA is relatively new for mainstream evaluation and like most other innovations it has yet to be fully explored in this field This volume aims to fill the gaps within SNA methodology exploration by first reviewing the foundations and development of network analysis within the social sciences and the field of evaluation The focus then turns to the methodology Who holds power in a network and what measures indicate whether that power is direct or indirect Which subgroups have formed and where are they positioned in an organization How divided is an organization Who forms the core of collaboration and where are the experts in an organization These are the types of common questions explored in the four case studies of the use of network analysis within an evaluative framework
