## **The Bakerloo Line:**

**The History of the Bakerloo Line** Clive D W Feather,2020-10-26 The Bakerloo is the dull brown line on London's iconic tube map. It doesn't have the multiple branches of the Northern or District Lines, the loops of the Piccadilly or the Central, or the puzzling shape of the non-circular Circle. But its nondescript appearance belies a history encompassing fraud in the boardroom and drama in the courtroom for a line first conceived by sports enthusiasts and finished by Chicago gangsters. With over 120 photographs, this book provides a history of its development from obtaining Parliamentary permission and raising finance through to geology and construction techniques. It details its operation including rolling stock, signalling, stations, and signage from the beginning to the current day. The impact of the two World Wars is revealed, and it remembers some of the accidents and tragedies that befell the line. Finally, the book describes its evolution up to the present day and beyond.

**The Bakerloo Line** M. A. C. Horne,1990      **London Underground , London's Underground Since 1985** Jim Blake,2024-09-30 JIM BLAKE's second volume of his photographs featuring the London Underground covers the period from 1985, shortly after the Thatcher regime's destruction of London Transport and its re-birth as London Underground Ltd, to 2021 when the Northern Line gained its new branch from Kennington to Battersea Power Station. This was a turbulent time in the system's history, encompassing the withdrawal of the last pre-war passenger rolling stock in 1988 and then the abolition of two-person operated trains at the beginning of 2000. With the exception of the Waterloo City Line, which was transferred from British Rail to London Underground in the 1990s, all Underground lines are covered, together with the rolling stock operating them. Jim's photographs concentrate on the older types. What is very striking in them is how the system seemed to be going downhill rapidly during the Thatcher years, when this survey begins, plagued by the curse of graffiti and liberally littered, thanks to cuts in staff who once dealt with such problems. Fortunately, since Transport for London's takeover of the Underground from 2000 onwards, things in that respect have markedly improved: trains and stations are much cleaner and therefore welcoming to passengers. The contrast between the late 1980s/early 1990s and today's Underground is very clear in Jim's photographs featured here, most previously unpublished. It is unfortunate that further improvements, not to mention long-planned extensions to the system, continue to be frustrated by government spending restrictions at the time of writing.

**The Railways of London Docklands** Jonathan Willis,2022-09-15 This book provides a comprehensive study of the planning and building of railways in London's Docklands, reflecting on the past 180 years of railway development. It describes the creation of the enclosed working docks at the start of the 19th Century and the introduction of railways in the middle of the century. By the 1970s, the decline of the working docks led to a plethora of plans to regenerate the area, but with little agreement on what should be done. The setting up of the London Docklands Development Corporation by the former Secretary of State for the Environment, Lord Heseltine, was a significant landmark, expediting the Canary Wharf development. The book describes in detail the modern railway projects created to support the

subsequent growing employment and population of the area including the Docklands Light Railway with its multiple extensions the Jubilee Line extension and Crossrail Elizabeth Line The book will appeal to a wide audience To railway enthusiasts who wish to learn more about the why and the how such projects are approved and built and to transport and planning professionals who wish to understand more about the ups and downs of the relationship between transport and development and the decision making processes within changing political economic and employment scenarios The end result has provided Docklands with a comprehensive hierarchy of quality transport services to match anyway in the world
