## Strange Words:

*Funny Words in Plautine Comedy* Michael Fontaine, 2009-12-09 Plautus Rome's earliest extant poet was acclaimed by ancient critics above all for his mastery of language and his felicitous jokes and yet in modern times relatively little attention has been devoted to elucidating these elements fully In *Funny Words in Plautine Comedy* Michael Fontaine reassesses some of the premises and nature of Plautus comedies Mixing textual and literary criticism Fontaine argues that many of Plautus jokes and puns were misunderstood already in antiquity and that with them the names and identities of some familiar characters were misconceived Central to his study are issues of Plautine language style psychology coherence of characterization and irony By examining the comedian's tendency to make up and misuse words Fontaine sheds new light on the close connection between Greek and Roman comedy Considerable attention is also paid to Plautus audience and to the visual elements in his plays The result is a reappraisal that will challenge many received views of Plautus positioning him as a poet writing in the Hellenistic tradition for a knowledgeable and sophisticated audience All quotations from Latin Greek and other foreign languages are translated Extensive indices including a pindex facilitate ease of reference among the many jokes and plays on words discussed in the text

**The Psychology of Reading** Keith Rayner, Alexander Pollatsek, 2013-10-14 The last 20 years have witnessed a revolution in reading research Cognitive psychologists using high speed computers to aid in the collection and analysis of data have developed tools that have begun to answer questions that were previously thought unanswerable These tools allow for a chronometric or moment to moment analysis of the reading process Foremost among them is the use of the record of eye movements to help reveal the underlying perceptual and cognitive processes of reading This volume provides a coherent framework for the research accomplished on the reading process over the past 15 years It emphasizes how readers go about extracting information from the printed page and how they comprehend the text

Dividing Reality Eli Hirsch, 1993-04-29 Why does our language divide up reality one way rather than another On what rational basis does our language contain certain kinds of general words rather than others Hirsch shows that a language can be constructed which describes reality in ways we would find absurdly irrational for example by classifying normally disparate items under the same general term The apparent irrationality of the new language does not depend on its impoverished fact stating power as this may be equivalent to the fact stating power of ordinary language the problem then is to explain exactly what is wrong with it Various options are explored and criticized such as the hypothesis that language must reflect an underlying objective distinction between natural kinds that there are pragmatic reasons for the way language functions as it does and that as a matter of metaphysical necessity strange ways of dividing up reality are constructions out of ordinary ways Having demonstrated that this newly identified problem is in fact a serious one which

cannot be easily solved or brushed aside Hirsch offers his own suggestions for a possible solution *Aristotle on the Art of Poetry* Aristotle,1920-01-01 *Western Journal of Education* ,1900 *Educational Foundations* ,1907 **The Sunday Magazine** ,1889 *Supplementary Educational Monographs* ,1918 *Reading* Charles Hubbard Judd,William Scott Gray,1918 *Novels* Edward Bulwer Lytton Baron Lytton,1892 *Lotus Magazine* ,1918 **The Columns** ,1930 *The Menorah Journal* ,1927 *The New Yorker* Harold Wallace Ross,William Shawn,Tina Brown,David Remnick,Katharine Sergeant Angell White,Rea Irvin,Roger Angell,1928 **Biblico-theological Lexicon of New Testament Greek** Hermann Cremer,1895 *...
