the people from the higher class It was only in the 17th century when it became popular amongst commoners It was Japan that introduced bonsai to the rest of the world as an artistic pursuit The physical characteristics may differ basically because you can plant almost any tree and grow it as a miniature version Their appearance will depend highly on the type of bonsai which we will discuss further in the next section Nonetheless for experts there are some things that they look at in the physical growth of bonsai to judge its appearance Among others one of the most important is to have a trunk that shows a lot of character The trunk should taper as it goes up The bottom part of the trunk must be entirely visible It is also important that the arrangement of the branches is in ascending order With this if you look at the bonsai tree from the top it must form a triangular shape even if the sides are not equal in terms of length Another important characteristic that must be present in a bonsai is that the roots should radiate from the base of its trunk Part of the root must be visible although they should never cross one another The maximum height of a bonsai tree should be four feet Its height must be proportional to the size of its canopy It is also necessary that the bonsai comes with a healthy foliage which is an indication that it receives the care and maintenance that it demands

[Peace Tree from Hiroshima](#) Sandra Moore, 2015-07-14. Winner of the 2015 Gelett Burgess Award for Best Intercultural Book. Winner of the 2015 Silver Evergreen Medal for World Peace. This true children's story is told by a little bonsai tree called Miyajima that lived with the same family in the Japanese city of Hiroshima for more than 300 years before being donated to the National Arboretum in Washington DC in 1976 as a gesture of friendship between America and Japan to celebrate the American Bicentennial. From the book: In 1625 when Japan was a land of samurai and castles, I was a tiny pine seedling. A man called Itaro Yamaki picked me from the forest where I grew and took me home with him. For more than three hundred years, generations of the Yamaki family trimmed and pruned me into a beautiful bonsai tree. In 1945, our household survived the atomic bombing of Hiroshima. In 1976, I was donated to the National Arboretum in Washington D.C. where I still live today, the oldest and perhaps the wisest tree in the bonsai museum.
