Gene Research at the Cia Nickolas Bay, 2008-02-21 Gene research at the CIA is an explosive sci fi thriller where a young doctor named Dr JANET STEWART is caught up in a top secret government experiment slipping out of control Entangled in a web of politics espionage and terrorism Dr Stewart is taking the gamble of her life where one wrong move could be her last Her discovery of the gene that controls a person's IQ is used in secret experiments in the armed forces children's clinics prisons and at terrorist interrogations at Guantanamo Bay where personality changes are made Her success advances her politically to earn a seat on the cabinet of the President of the United States Dr Stewart's association with two neurosurgeons Dr JOHN STODDARD and Dr JAMES ROTH lead to the discovery of the C mystery gene An amazing observation is made after testing humans indicating this gene is fundamental in their thoughts involving faith and trust They test an Atheist Agnostic dogmatic Catholic and a Muslim Theories are made on how a suicide bomber constantly reinforces his faith gene to enable him to destroy his own life and that of others Finally the President of the United States decides to use these gene discoveries on thousands of foreign students invited as guests to study democracy and our life styles in the United States to in effect make them our secret ambassadors to promote democracy on their return home This story illustrates how an innocent humanitarian idea slowly becomes a modern day Dr Jekyll and Mr Hyde scenario Individual IQs are changed and personalities regress from adult to that of children Even the President is enticed by the lure of absolute power through gene control The warning is simple as we follow the path to new genetic discoveries we must be valiant not to surrender our moral and ethical values We have the power and knowledge to create monsters

Genetic Swaps an Ethical Dilemma Nickolas Bay, 2008-12-01 This story involves the illegal and legal swapping of one person's gene for implanting into another person to change their intelligence Although this book is fictional it points out the ways science could change our political and ethical

values This book begins with a goal to help disabled children through new discoveries and gene manipulations by swapping genes The main character Dr Janet Stewart directs a secret CIA lab whose basic purpose is to discover how certain genes operate Her discovery of the gene that controls a persons IQ is secretly tested in childrens clinics military academies prisons and finally in terrorist interrogations at Guantanamo Bay Genetic swaps are performed with dramatic results Dr Stewarts associations with two neurosurgeons who are also interested in genetic research bring about the discovery of the C mystery gene An amazing observation is made after testing humans at a secret lab in Pahrump Nevada This gene proves to be fundamental in a persons thought regarding faith and trust This leads to tests with Atheists Agnostics Catholics and Muslims Tests show how a suicide bomber constantly reinforces his faith gene through free will to enable him to destroy his own life and that of others Finally The President of the United States directs Dr Stewart to devise a program to be used on all foreign students visiting the United States that would make them our secret ambassadors without them ever knowing it This is not a far fetched idea New gene discoveries are being made as you read this novel The purpose of this book is to give a simple warning As a world leader the United States must be vigilant not to exchange human control for human rights This new knowledge is dangerous in the wrong hands

The Chameleon Project Nickolas Bay,2004-12 A young Dr Janet Stewart finds herself in an alliance with two neurosurgeons to create a better world through new DNA discoveries and applications Their journey puts them in direct contact with the CIA prisoner interrogations in Guantanamo Bay and an experiment gone badly with terrorists in Iraq Their experiments create Chameleon character changes in their subjects This is a story about new discoveries in DNA that unravel the tapestry of humankind and how it has been affected over the course of evolution The fiction in this saga points out a few of the problems we create as these revelations take place This topic affects everyone regardless of his or her religion politics race or ethnic background Join our Dr Janet Stewart as she is enveloped in mystery intrigue espionage deception terrorism and attempted kidnapping
