Ecologies of Architecture Andrej Radman, 2021-06-30 Drawing on a range of philosophical texts Andrej Radman brings together a collection of 11 of his essays published over the last decade to show that when a society manipulates its matter it is not a reflection of culture it is culture To speak of ecologies of architecture is to break with judgement for experience As Gilles Deleuze put it in his book on Nietzsche it is not about justification but a different way of feeling another sensibility If to think differently we have to feel differently then the design of the built environment has no other purpose but to transform us While engineering is solution oriented architecture stays with the problem so as to tease

out a creative potential

Deleuze and Architecture Helene Frichot,2013-05-20 Critiques the legacy and ongoing influence of Deleuze on the discipline and practice of architecture This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world Since the 1980s Deleuze s philosophy has fuelled a generation of architectural thinking and can be seen in the design of a global range of contemporary built environments His work has also alerted architecture to crucial ecological political and social problems that the discipline needs to reconcile
