school memories offer not only a tool for accessing the school of the past but also a key to understanding what people today know or think they know about the school of the past It describes in fact how historians work does not purely and simply consist in exploring school as it really was but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level Further it investigates the extent to which what people know reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult to do away with The book includes fifteen peer reviewed contributions that were presented and discussed during the International Symposium School Memories New Trends in Historical Research into Education Heuristic Perspectives and Methodological Issues Seville 22 23 September 2015
