Know An Epic Poem

Introduction
The first Viking longship was built in the North Sea in the year 789. It was a long and narrow boat, built of wood, and was used for both trade and war. The Vikings were a brave and adventurous people, and their longships were the key to their success. They sailed across the North Sea and the Atlantic Ocean, reaching as far as Iceland, Greenland, and North America. Their longships were built with a dragon-headed prow and stern, and were decorated with intricate carvings. They were also very fast and maneuverable, and could sail in rough weather. The Vikings were a great power in the North Sea region, and their longships were the symbol of their power and glory.
