internationally distinguished aerospace historian James R Hansen addresses all of the factors that led to the accident some of which were never included in NASA's Failure Team report submitted to the Presidential Commission Truth Lies and O Rings is the first look at the Challenger tragedy and its aftermath from someone who was on the inside recognized the potential disaster and tried to prevent it It also addresses the early warnings of very severe debris issues from the first two post Challenger flights which ultimately resulted in the loss of Columbia some fifteen years later *TV Displays Disaster As the Challenger Explodes* Rebecca Rissman,2019-08 On point historical photographs combined with strong narration bring the story of the Challenger explosion to life Kids will learn about how it happened the subsequent investigation into its causes and how it set back U S investment in space exploration As an added bonus readers will learn about how this played out on TV By the time of the Challenger the only network covering it in live time was CNN as people thought of space flight as old hat This brought space flight back into the public consciousness albeit not in a good way Accompanying video will show readers what viewers saw at the time [The Challenger Disaster](#) Carmen Bredeson,1999 Describes the events surrounding the explosion of the Challenger shuttle in 1986 the investigation of this disaster and the seven astronauts who died **The Space Shuttle Challenger Disaster** Charles River Charles River Editors,2017-01-26 Includes pictures Profiles the origins of the mission and what went wrong Includes online resources and a bibliography for further reading Includes a table of contents In the decades after the Apollo program American space shuttles flew over 130 missions and successfully completed over 98% of them but unfortunately the two most famous missions were the ones that ended tragically aboard the Challenger and Columbia The Space Shuttle Challenger was the most heavily used space shuttle in the three years it was operational carrying the first minority astronaut and woman astronaut into space Challenger was also the first space shuttle to complete a landing at night On the morning of January 28 1986 the Space Shuttle Challenger launched for the 10th time beginning mission STS 51 L Space shuttles had already successfully completed 24 missions and no American spacecraft had ever failed to reach orbit during an official mission On this mission the Challenger was carrying a satellite for the Tracking and Data Relay Satellites system which was to be deployed in orbit The crew included Ronald McNair who had already been the second African American in space and Ellison Onizuka who had already been the first Asian American astronaut in space But the highlight of the mission was to be the NASA Teacher in Space Project in which a civilian teacher would give teaching lessons to his or her class while onboard the space shuttle The winner of the competition was Christa McAuliffe a high school teacher in Concord New Hampshire who wrote a winning essay and had to undergo a year of astronaut training before that fateful day It was a beautiful morning and many spectators came to the Kennedy Space Center to watch the launch including McAuliffe's parents and her students Several news networks were carrying live broadcasts of the launch including live shots of McAuliffe's parents as they watched the Challenger liftoff Mission Control's transmissions to the Challenger were being blared over loudspeakers to give spectators a play by play of the shuttle's ascent Ascent seemed to be going normally during

the first minute but about 75 seconds into the ascent a plastic O ring used to seal a joint in one of the solid rocket boosters failed causing a breach of hot gas That gas spread to the other rocket booster and the external fuel tank causing an explosion When the spectators saw the explosion many of them started cheering unaware of what was really happening But Mission Control quickly announced that there had been some sort of problem and the crowd became confused and then panicky as the space shuttle fuel tank and rocket boosters all broke apart and flew in opposite directions Some cameras fixed on the falling debris as it fell to the ocean while others stayed focused on McAuliffe's parents The entire crew was killed in the explosion and investigations concluded that they may have survived until crashing into the ocean After the Challenger disaster the space shuttles were grounded for about two years and a commission issued findings that would be used in an effort to prevent similar tragedies
