Vapour Phase Chromatography:

Gas Phase Chromatography Rudolf Kaiser, 2012-12-06 THE present volume which is the first of a three volume work on gas phase chromatography deals with the problems of gas chromatography in packed columns Gas chromatography like any other analytical method is mainly a matter of practical skill and therefore emphasis has been given to the apparatus at the expense of a more detailed presentation of the theory The aim of this book is to make lecturers and students chemists works engineers and laboratory workers familiar with this highly effective branch of analytical physical chemistry I hope too that the experienced worker may find references which will be of value to him in his work and which will spare him part of the now almost impossible task of keeping up to date with the literature The nomenclature used here is the result of a number of discussions with Professor E Cremer and Dr E Bayer and I should like to take this opportunity of expressing my grateful thanks to them The present book is based partly on my book *Gas Chromatography* which appeared at the end of 1959 Numerous discussions with Professor E Leibnitz and his colleagues H P Angele M Hofmann H Holzhauser M Kuhl and H G Struppe and the experimental work carried out with them have all influenced this revision I should also like to thank Dr H Kienitz and his colleagues Dr K Dorfner Dr H D Ermshaus and Dr H Runge for valuable suggestions *Vapour Phase Chromatography* Institute of Petroleum (Great Britain), 1957 *Vapour Phase Chromatography: Proceedings... Sponsored by The... Institute of Petroleum, Held At... London, on 30th May - 1st June, 1956* London International symposium on vapour phase chromatography, 1957 *Gas Phase Chromatography* Rudolf Kaiser, 2012-12-06 THE remarkable capabilities of capillary gas partition chromatography or in short capillary chromatography are beyond all doubt In spite of this difficulties are continually arising in the experimental realization of this interesting development of gas chromatography and this hinders the rapid acceptance of these methods For this reason in the present work I have dealt with experimental and practical problems rather than with theoretical aspects hoping that this may serve to remove many of the problems concerned The present publication is based on experimental work carried out in productive collaboration with my teachers and colleagues to whom I owe a great deal I should like to thank the following for their valuable assistance and stimulating suggestions Professor E Cremer Dr H Kienitz and his colleagues Professor A I M Keulemans Dr I Halasz and in particular Mr D H Desty and Dr R P W Scott I should also like to thank the management of the Badische Anilin und Sodafabrik AG Ludwigshafen for their generous support and for permission to publish this book The outstanding co operation of the Verlag Bibliographisches Institut Mannheim was for me a particular pleasure **Vapour Phase Chromatography**, 1971
