Working Knowledge Work Based Learning And Education Reform:

Working Knowledge Thomas Raymond Bailey,2004 This book describes and analyzes the current state of work based learning in the US It begins with a review of the history of work based learning and its place in policy making around school reform which establishes the theoretical and empirical basis for the rest of the book Based on over five years of research on work based learning in high school and community college programs across the country it explores the potential for using work based learning as part of a broad education reform strategy The authors emphasize the importance of situated learning in understanding work based learning and in creating engaging and educational experiences for youth **Working Knowledge** ,2004 **Teaching English Language Learners in Career and Technical Education Programs** Victor M. Hernández-Gantes,William Blank,2008-10-09 Exploring the unique challenges of vocational education this book provides simple and straightforward advice on how to teach English Language Learners in the classroom in the laboratory or workshop and in work based learning settings **International Encyclopedia of Adult Education** L. workplace Spurred by widespread joblessness and job instability among young adults the federal government launched ambitious educational reforms in the 1990s to promote career development activities for students In recent years however the federal government has shifted its focus to test based reforms like No Child Left Behind that emphasize purely academic subjects At this critical juncture in education reform *Improving School To Work Transitions* edited by David Neumark weighs the successes and failures of the 90s era school to work initiatives and assesses how high schools colleges and government can help youths make a smoother transition into stable well paying employment Drawing on evidence from national longitudinal studies surveys interviews and case studies the contributors to *Improving School To Work Transitions* offer thought provoking perspectives on a variety of aspects of the school to work problem Deborah Reed Christopher Jepsen and Laura Hill emphasize the importance of focusing school to work programs on the diverse needs of different demographic groups particularly immigrants who represent a growing proportion of the youth population David Neumark and Donna Rothstein investigate the impact of school to work programs on the forgotten half students at the greatest risk of not attending college Using data from the 1997 National Longitudinal Study of Youth they find that participation by these students in programs like job shadowing mentoring and summer internships raise employment and college attendance rates among men and earnings among women In a study of nine high schools with National Academy Foundation career academies Terry Orr and her fellow researchers find that career academy participants are more engaged in school and are more likely to attend a four year college than their peers Nan Maxwell studies the skills demanded in entry level jobs and finds that many supposedly low skilled jobs actually demand extensive skills in reading writing and math as well as the new basic skills of communication and problem solving Maxwell recommends that school districts collaborate with researchers to identify which skills are most in demand in their local labor markets At a time when test based educational reforms are making career development programs increasingly vulnerable it is worth examining the possibilities and challenges of integrating career related learning into the school environment Written for educators policymakers researchers and anyone concerned about how schools are shaping the economic opportunities of young people *Improving School To Work Transitions* provides an authoritative guide to a crucial issue in education reform
