TRAC: Trends in Analytical Chemistry U A Th Brinkman, J R Durig, P. Van Espen, 2013-09-24 TRAC Trends in Analytical Chemistry Volume 8 provides information pertinent to the trends in the field of analytical chemistry This book presents a variety of topics related to analytical chemistry including protein purification biotechnology Raman spectroscopy in pharmaceutical field electrokinetic chromatography and flow injection analysis Organized into 50 chapters this volume begins with an overview of scientometric investigations that enable the quantitative study of the evolution of its various components and can thereby uncover how information is utilized to diffuse and generate knowledge This text then discusses the economic significance of sensing and control as being the main factors in determining process economics and in offering products and business opportunities Other chapters consider the important relationship between Raman spectroscopy and other analytical methods This book discusses as well the interfaces between a gas chromatograph and a Fourier transform infrared spectrometer The final chapter deals with chemometrics routines This book is a valuable resource for analytical chemists and biochemists

Food Protein Chemistry Joe Regenstein, 2012-12-02 Food Protein Chemistry An Introduction for Food Scientists discusses food proteins and how they are studied Proteins are both biological entities and physicochemical compounds and they will be examined in both contexts in this volume The chemical and physical properties of proteins will be viewed from the perspective of chemists despite the fact that their use in the food supply emphasizes their biological nature Key topics discussed include proteins as essential to life amino acids protein classification selected proteins of the most important food systems and protein structure The book also includes chapters on protein measurement protein purification and spectral techniques for the study of proteins The book requires readers to have the equivalent of the Institute of Food Technologists requirements for undergraduate food science majors It also assumes a knowledge of math through calculus While primarily intended for senior and first year graduate food science students the text may also be useful to researchers in allied fields

TRAC: Trends in Analytical Chemistry Susan E. Lord, 2013-09-17 Trends in Analytical Chemistry Volume 3 focuses on developments in analytical chemistry including the adoption of automation in laboratory processes chromatography and flow analysis The selection first underscores the effect of automation on the operations of analytical laboratories and techniques for the automated optimization of HPLC separations Topics include initial requirements window diagrams and chemometric approaches The text then ponders on generation of statistical tables by microcomputer enzyme electrodes for continuous in vivo monitoring and enantiomeric analysis of the common protein amino acids by liquid chromatography The publication takes a look at sample preparation for the analysis of heavy metals in foods and application of ion selective electrodes in flow analysis including dry ashing acid extraction and ion selective electrodes in flowing systems The text then examines trends in laboratory information management systems zone
