Changing Higher Education in East Asia Simon Marginson, Xin Xu, 2022-02-24. East Asia is a most dynamic region and its fast developing higher education and research systems are gathering great momentum. East Asian higher education has common cultural roots in Chinese civilization and in indigenous traditions; each country has been shaped in different ways by Western intervention and all are building global strategies. Shared educational agendas combine with long political tensions and rising national identities. Hope and fear touch each other. What are the prospects for regional harmony in diversity? How do internationalization and indigenization interplay in higher education in this remarkable region where so much of the future of humanity will be decided? Experts from Australia, China mainland, Hong Kong SAR, Japan, South Korea, Taiwan, the UK and Vietnam probe these dynamics with original perspectives, robust evidence and brilliant writing. *Changing Higher Education in East Asia* deepens our understanding of internationalization and globalization agendas such as world class universities and international students. It takes readers further exploring the role of higher education in furthering the global public and common good, world citizenship education, the internationalization of the humanities and social sciences, geopolitics and higher education development, cross-border academic mobility, the effects of the Covid-19 pandemic on regional student mobility and future regionalization in East Asia.

Becoming World Class Clive Morton, 2016-07-27. This book addresses the issues concerned with the achievement of world class competitiveness by major international companies. It is the story of creating success where failure was endemic and demonstrating that so-called Japanese management techniques can be applied elsewhere by other western companies to attain market supremacy. It is a book based on personal experience but related to theory and thus is of use to the reader trying to change where they work for the better, as well as providing answers to a number of commonly asked questions: Why are the Japanese so consistently successful? Can we compete and become World Class using our culture and Japanese management techniques? Is there a manufacturing future for the UK and Europe in the face of competition from the Pacific Basin? How do we achieve world class competitiveness? How do you start this in your business?
