mayor misses his first public speech as he is being held up in a traffic jam All these examples taken from daily business and their negative effects such as the loss of time a damaged reputation and higher costs could have been avoided with an appropriate planning beforehand Projects are even more critical as they are by definition unique Although this idea seems to be consistent and companies should therefore strive to complete their projects successfully only 32 % of all projects succeed in terms of compliance with time budget and specifications 44 % are completed late exceeding budget showing a deficit in features or with a combination thereof The remaining 24 % of all projects fail i e they are cancelled before completion or are finished but never used Going back to the year 2000 this failure rate has never been higher A reason for this may be that the unique nature of projects also implies uncertainties the more aspects of a project are unique the higher are the entailed uncertainties and the higher is the risk to fail And projects are becoming more and more demanding with an increasing pressure on companies in terms of time budget and quality As globalisation is rising the need for fast and comprehensive adjustments of processes systems and products is increasing simultaneously To be able to bear the growing competitive pressure companies need fast innovative and interdisciplinary solutions which they achieve best by applying projects But projects lacking clear targets specifications communication channels schedules and budgets are likely to fail Hence an appropriate project planning is vital to avoid or at least minimise all uncertainties and risks that could lead to a full or partial failure of the project But project planning itself does not guarantee success It must be executed in a way that is comprehensive and efficient at the same time Finding out which planning processes are required and to which detail is crucial for performing a completely successful project

Project Management for Information, Technology, Business, and Certification Gopal K. Kapur, 2005 For courses in Information Technology and Business This text supplies students with proven project management processes broadly tested techniques and solid approaches to the successful management of projects in varying sizes and degrees of complexity Individual steps demonstrate how a project manager effectively and efficiently navigates through the what when and how of work necessary to take a project from idea to execution and shows the important role disciplined project management plays in transforming corporate strategy into reality

*Comprehensive Project Management* Adedeji Bodunde Badiru, P. Simin Pulat, 1995 Project Management the process of managing allocating and timing resources to achieve a given goal in an efficient and expedient manner has emerged as a separate discipline that is being increasingly embraced by various sectors ranging from business to engineering Comprehensive in perspective this book presents an approach to project management from planning through implementation that integrates qualitative and quantitative techniques Practical in approach it demonstrates with numerous examples how three categories of tools management practices optimization models and computer applications complement one another to enhance overall project management Considers traditional project management techniques modern applications of operations research methodologies and computer applications as well as supporting topics such as forecasting and inventory management

Reviews other methodologies such as regression analysis and decision making methodologies that a project manager can utilize Organizes chapters hierarchically to illustrate the incremental steps in a project management process from setting project goals to terminating the project Features numerous examples and a chapter length case study For Industrial Engineers and Operations Managers **Public Employees Leadership Institute** Robert Bayes Sperry,2011 Public agencies in Iowa are continually challenged with reduced staff levels reduced budgets and increased expectations for services provided Responding to these demands requires a well informed and coordinated team that includes professionals supervisors technicians lead workers and workers Becoming a coordinated team requires the training and interaction to produce a common foundation to build upon In 2007 a training program did not exist in the state to provide this level of training for existing or upcoming managers and leaders of public agencies The Iowa Local Technical Assistance Program LTAP in conjunction with Iowa public agency representatives set out to provide that foundation by developing the Iowa Public Employees Leadership Academy which was renamed the Public Employees Leadership Institute in July 2011 The Institute is an on demand online training program designed to create better or new leaders and supervisors for Iowa s public agencies The Institute provides a curriculum to train the next generation of leaders who will replace existing leaders when retirements occur Through the Institute Iowa LTAP will provide a coordinated structured non credit educational program available for a modest fee The techniques and skills offered through the Institute can apply to all who wish to develop or sharpen their leadership and management abilities This will be true whether the participants are employed in the public or private sector The 14 courses that were developed and are being offered are as follows Supervisory Techniques and Skills Team Development Communications Skills Leadership Skills Community Service Customer Orientation Legal Understanding Fundamentals of Government Finance Resource Management Operations and Maintenance Basic Management Emergency Management Project Management and Winter Maintenance Management **Computer Decisions** ,1983 Mobilize Yourself!
