Translating Strategy Into Action:

The Balanced Scorecard Robert S. Kaplan, David P. Norton, 1996-08-02 The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard—financial measures, customer knowledge, internal business processes, and learning and growth—offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard; in the second part, they describe the steps organizations must take to build their own Scorecards; and finally, they discuss how the Balanced Scorecard can be used as a driver of change.

Strategy in Action Boris Yavitz, William Herman Newman, 1984-03 From Simon Schuster. *Strategy in Action* is Boris Yavitz and William H. Newman's guide to the execution, politics, and payoff of business planning. Two management consultants explain how to transform business objectives into strategic action, detailing measures for changing business practices, eliminating ineffective personnel, and instilling confidence through well-defined statements of goals and missions.

Operations Strategy in Action Kim Hua Tan, Rupert Matthews, 2009-01-01 This fresh and enlightening book offers a rounded overview of operations strategy with a particular focus on implementation. The premise of the book is that developing an effective operations strategy without its subsequent implementation will render the strategising process a waste of time and resources. The authors explain the pros and cons of existing approaches to implementation, as well as offering a systematic framework for turning strategic intent into actions. They offer a fresh look at a subject whose importance within academia and industry is rapidly increasing due to the need to refocus the attention of business upon the elements that actually add value to society's operations. Although operations strategy implementation is a broad and complex subject area, by developing a mature, broad perspective of the subject, the authors consider that all elements of an organisation have potential to contribute directly by adding tangible values to the operations strategy process. This study will be of great interest to academics and will also give practitioners confidence in efficiently formulating and effectively implementing strategies that reflect the needs of today's business.

Advanced undergraduate and postgraduate students studying operations strategy and manufacturing strategy will find this book an essential and fascinating read. In short, it should be able to offer all those involved in operations management a comprehensive and coherent view of the subject that until now has been lacking.

The Balanced Scorecard Robert S. Kaplan, David Norton, 2009 Kaplan, accounting Harvard and Norton, president of Renaissance Solutions Inc, created the balanced scorecard to assist businesses in moving from ideas to action, achieving long-term goals, and obtaining feedback about strategy. The balanced scorecard consists of four sections: clarifying and translating vision and strategy; communicating and linking strategic objectives and measures; planning, setting targets, and aligning strategic initiatives; and enhancing strategic feedback and learning. Because the writing is technically

oriented and somewhat detailed this work is geared toward scholars and high level business planners However its clear organization makes reading and understanding the concepts much easier Recommended for upper level and graduate business students and senior practitioners in the strategic planning field
