Understanding Modern Architect:

The Elements of Modern Architecture Antony Radford, Amit Srivastava, Selen B Morkoc, 2014-06-17 Fifty of the world's greatest modern buildings from 1950 to the present dissected and analyzed through specially commissioned freehand drawings After a period in which computation derived architecture driven by digital design tools data analysis and new formal expression has thrived students and their teachers have returned to age old techniques before employing the digital tools that are a part of every architect's studio Tired of the perfectly rendered screen image architects are making presentations that are clearly the work of the hand and the mind not the computer This ambitious publication organized chronologically is aimed at a new generation of architects who take technology for granted but seek to further understand the principles of what makes a building meaningful and enduring Each of the fifty works of architecture is presented through detailed consideration of its site topology and surroundings natural light volumes and massing program and circulation details fenestration and ornamentation Over 2 500 painstakingly hand drawn images of the buildings of the past seven decades help readers return to the core values of understanding site and creating buildings looking with the eyes engaging through direct physical experience and constructing by hand *Understanding Modern Architecture* Patrick Nuttgens, 1988

Key Modern Architects Andrew Higgott, 2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect's work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect's working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect's most significant projects along with suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a critical approach Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history **The Meaning of Modern Architecture** Hans Rudolf Morgenthaler, 2016-03-09 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and

art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities sensual and intuitive understandings of composition form and space are emphasized These aspects are especially significant because Modern Architecture lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture

Modern Architecture and the Mediterranean

Jean-Francois Lejeune, Michelangelo Sabatino, 2009-12-04 Bringing to light the debt twentieth century modernist architects owe to the vernacular building traditions of the Mediterranean region this book considers architectural practice and discourse from the 1920s to the 1980s The essays here situate Mediterranean modernism in relation to concepts such as regionalism nationalism internationalism critical regionalism and postmodernism an alternative history of the modern architecture and urbanism of a critical period in the twentieth century
