Expert System Applications to Telecommunications Jay Liebowitz,1988-02-26 Describes some of the expert systems being developed for

applications in the telecommunications field capturing the knowledge and professional experience of the telecommunications experts. Written by leading authorities in expert systems applications, the book addresses network and spectrum management, local area networks configuration, monitoring and control, and scheduling of satellite experimenter requests. Material is logically divided according to three issues. Part 1 deals with case studies where expert systems have been developed for telecommunications. The second section discusses methodologies that could be used specifically for building telecommunications. The third part deals with potential areas in telecommunications for applications in expert system development.

AI-Powered Productivity Dr. Asma Asfour, 2024-07-29

This book *AI Powered Productivity* aims to provide a guide to understanding utilizing AI and generative tools in various professional settings. The primary purpose of this book is to offer readers a deep dive into the concepts, tools, and practices that define the current AI landscape. From foundational principles to advanced applications, this book is structured to cater to both beginners and professionals looking to enhance their knowledge and skills in AI. This book is divided into nine chapters, each focusing on a specific aspect of AI and its practical applications. Chapter 1 introduces the basic concepts of AI, its impact on various sectors, and key factors driving its rapid advancement, along with an overview of generative AI tools. Chapter 2 delves into large language models like ChatGPT, Google Gemini, Claude, Microsoft's Turing NLG, and Facebook's BlenderBot, exploring their integration with multimodal technologies and their effects on professional productivity. Chapter 3 offers a practical guide to mastering LLM prompting and customization, including tutorials on crafting effective prompts and advanced techniques, as well as real-world examples of AI applications. Chapter 4 examines how AI can enhance individual productivity, focusing on professional and personal benefits, ethical use, and future trends. Chapter 5 addresses data-driven decision making, covering data analysis techniques, AI in trend identification, consumer behavior analysis, strategic planning, and product development. Chapter 6 discusses strategic and ethical considerations of AI, including AI feasibility, tool selection, multimodal workflows, and best practices for ethical AI development and deployment. Chapter 7 highlights the role of AI in transforming training and professional development, covering structured training programs, continuous learning initiatives, and fostering a culture of innovation and experimentation. Chapter 8 provides a guide to successfully implementing AI in organizations, discussing team composition, collaborative approaches, iterative development processes, and strategic alignment for AI initiatives. Finally, Chapter 9 looks ahead to the future of work, preparing readers for the AI revolution by addressing training and education, career paths, common fears, and future trends in the workforce. The primary audience for the book is professionals seeking to enhance productivity and organizations or businesses. For professionals, the book targets individuals from various industries, reflecting its aim to reach a broad audience across different professional fields. It is designed for employees at all levels, offering valuable insights to both newcomers to AI and seasoned professionals. Covering a range of topics from foundational concepts to advanced applications, the book is particularly relevant for those interested in improving efficiency, with a strong emphasis

on practical applications and productivity tools to optimize work processes For organizations and businesses the book serves as a valuable resource for decision makers and managers especially with chapters on data driven decision making strategic considerations and AI implementation HR and training professionals will find the focus on AI in training and development beneficial for talent management while IT and technology teams will appreciate the information on AI tools and concepts
