Museums and Silent Objects: Designing Effective Exhibitions Francesca Monti,Suzanne Keene,2016-04-15 In a society where split second decisions about the value of things are grounded on how they look museum visitors are often drawn to visually striking or iconic objects This book investigates the question of the treatment of items on display in museums which are less conspicuous but potentially just as important as the striking objects arguing that it is important to show that all objects illustrate potentially interesting cultural contexts and content The authors explore the disciplines of architecture design cognitive science and museology and offer a methodology by which the quality of museum exhibitions can be judged from a visitor centred perspective They provide new insights into the visitor object encounter and the relationship between visitors objects and museums In addition the book offers a set of useful practical tools for museum professionals for audience research evaluating museum displays and for designing new galleries and striking exhibitions Richly illustrated with photos and diagrams and based on studies of famous galleries in world renowned museums the book will be essential reading for all those concerned with creating effective exhibitions in museum

Action, Contemplation, and Happiness C. D. C. Reeve,2012-03-12 The notion of practical wisdom is one of Aristotle s greatest inventions It has inspired philosophers as diverse as Martin Heidegger Hans Georg Gadamer Elizabeth Anscombe Michael Thompson and John McDowell Now a leading scholar of ancient philosophy offers a challenge to received accounts of practical wisdom by situating it in the larger context of Aristotle s views on knowledge and reality That happiness is the end pursued by practical wisdom is commonly agreed What is disputed is whether happiness is to be found in the practical life of political action in which we exhibit courage temperance and other virtues of character or in the contemplative life where theoretical wisdom is the essential virtue C D C Reeve argues that the dichotomy is bogus that these lives are in fact parts of a single life which is the best human one In support of this view he develops innovative

accounts of many of the central notions in Aristotle's metaphysics epistemology and psychology including matter and form scientific knowledge dialectic educatedness perception understanding political science practical truth deliberation and deliberate choice These accounts are based directly on freshly translated passages from many of Aristotle's writings Action Contemplation and Happiness is an accessible essay not just on practical wisdom but on Aristotle's philosophy as a whole
