as Flowchart Event Graph and Process Communication Graph Graph oriented distributed programming Program visualization for software understanding testing debugging and maintenance Object oriented re design based on legacy procedural software Cognitive models for designing software exploration tools Human comprehensibility of visual modeling diagrams in UML UML extended with pattern compositions for software reuse Visualization of software architecture and Web architecture for better understanding Visual programming and program visualization for music synthesizers Drawing diagrams nicely using clustering techniques for software engineering *NASA Tech Briefs*, 1997 Modern Industrial Automation Software Design Lingfeng Wang, Kay CHen Tan, 2006-02-17 The main subjects in this book relate to software development using cutting edge technologies for real world industrial automation applications A hands on approach to applying a wide variety of emerging technologies to modern industrial practice problems Explains key concepts through clear examples ranging from simple to more complex problem domains and all based on real world industrial problems A useful reference book for practicing engineers as well as an updated resource book for researchers *Energy Efficiency Improvements in Electronic Motors and Drives* Paolo Bertoldi, Anibal T. de Almeida, Hugh Falkner, 2012-12-06 The 1997 Kyoto Conference defined CO2 emISSION targets for the developed regions of the world The EU target of decreasing the emissions 8% below the 1990 level by 2010 will require a very substantial effort covering basically all activities if such a target is to be reached Energy efficient motor systems can provide one of the most important opportunities to achieve electricity savings in a cost effective way avoiding at the same time the emission of tens of millions of tons of carbon The reduction of energy consumption through improvements in energy efficiency is one of the major instruments for developed and developing countries to meet the Kyoto commitments Energy efficiency is also a key element of the European Union EU energy policy since it improves the efficiency of the economy increases energy supply security and decreases harmful emissions due to electricity generation Electric motor systems use over half of all electricity consumed in developed countries Typically about 70% of the electricity which is used in the industrial sector and about 35% of the electricity used in the commercial sector in the EU is consumed by motor systems In industry a motor on average consumes an annual quantity of electricity which corresponds to approximately 5 times its purchase price throughout its whole life of around 12 to 20 years **Graphical Programming** Robert Helsel, 1995 Coinciding with the release of HP VEE 3.0 this second edition provides an updated tutorial introduction to this graphical programming language designed to be used by software engineers involved in testing The text covers all the new features of HP VEE 3.0 including synchronized platforms operator interface enhancements and new networking capability It provides a quick start to the fundamentals of VEE then explores concepts in greater depth and considers other products that may be used effectively with VEE and concludes with guideposts on advanced uses of VEE *A Small Matter of Programming* Bonnie A.
